How to quickly automate more of your manufacturing business

Automate processes fast with Infor Value+ solutions

Industrial manufacturing faces numerous challenges including the need to increase efficiency and quickly respond to market changes. Adopting new technology can help, but it's often difficult to determine what to automate, the results it will deliver, and how long it will take. Infor Velocity Suite package is purpose-built for industrial manufacturing and includes the Infor Value+ catalog of solutions to automate more of your business. Each solution in the Infor Value+ catalog is built for your industry using the most advanced technology and can take as little as 30 days to start seeing value.

Why industrial manufacturing leaders use Infor Velocity Suite

Infor Velocity Suite is a package of solutions and services that makes process innovation easy and impactful for industrial manufacturing.

Get future-ready

Access Infor's most advanced technology to stay agile, adaptable, and ahead of the competition.

You can choose from Infor's catalog of Infor Value+ process automations using RPA, plus get usage of Infor GenAI and Infor Process Mining.

Simplify process innovation

Easily buy, important and use technology to improve processes continuously.

Infor Velocity Suite is a single technology package supported by Infor implementation experts who can make it happen for you.

Realize value

Achieve your organization's objectives with solutions proven to deliver results.

Whether you need to increase revenue, improve margins, or deliver better customer satisfaction, Infor Velocity Suite gets you there.
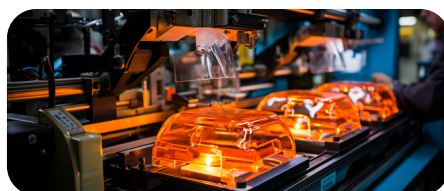

Accelerate process innovation with Infor Value+ catalog of solutions

The package includes the Infor Value+ catalog of solutions to automate more of your business. Each solution in the catalog is prebuilt to add onto your Infor CloudSuite and leverages advanced technology, like RPA and AI.

Innovate for growth
Leverage advanced technology to innovate on top of an Infor CloudSuite.

Quickly realize value
Give your teams a jumpstart with prebuilt solutions to realize fast time to value.

Gain industry advantage
Create a competitive edge using solutions designed for your industry.

Automate manufacturing processes with Infor Value+ solutions

Built with deep industrial manufacturing expertise, solutions in the Infor Value+ catalog are prebuilt and implemented by Infor experts on your behalf. Select any of the highlighted solutions below or from an ever-growing complete catalog.

Infor Value+ solutions for industrial manufacturing

Invoice Processing Uses AI and RPA to automatically process physical invoices after they are scanned, eliminating manual work for Accounts Payable. This includes extracting the right information from the paper invoice, matching it to a PO, storing the digital invoice, and updating the Infor ERP accordingly.	**Financial Period Closure Reconciliation** This Value+ solution leverages RPA and IDP to automate the generation and examination of financial reports. It consolidates discrepancies into a single notification, removing the need for manual intervention.	**Sales Contract Fulfillment** This Value+ solution analyzes and predicts contract fulfillment throughout its lifecycle. This tool integrates into the shipping planner and supply chain manager workspaces, offering a streamlined process for contract management. It empowers suppliers to proactively manage contracts, minimizing financial losses and optimizing margins through intelligent, data-driven insights.
Purchase Order Updates This Value+ solution uses RPA and IDP to automate the extraction and precise matching of supplier communications to purchase orders. It automates updates for changes in order details (e.g., quantity, delivery dates, and cancellations) to streamline the entire process and effectively manage exceptions such as replacement products, resulting in a faster and more accurate process.	**Vendor Compliance Checks** Your suppliers must be checked against governmental checklists (e.g., OIG) on a recurring basis to ensure you are allowed to do business with them. 'Set it and forget it' using AI and RPA advanced technology inside Infor's Vendor Compliance Checks automation solution.	**Return Sales Order Automation** Removes manual work from the return sales order process by using GenAI to extract information from emails sent by the Quality Team about a faulty product. It also uses RPA to create the Return Sales Order as well as an Inspection Order in the ERP so that teams stay up to date regarding the defective product.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
