

# How to embrace AI as an automotive tier supplier

**Reimagine your work with Infor Industry AI solutions and strategies tailored for tier suppliers**

As an automotive tier supplier, you must maintain financial profitability in the context of fast-changing demand, challenging market conditions and the ongoing CASE-driven industry transformation. Infor™ Industry AI solutions are purpose-built for your needs. They enable your operational agility, improve financial resilience, and provide predictive insights, expanding what's possible with artificial intelligence (AI) in the flow of work. Powered by the Infor Industry Cloud Platform and Amazon Web Services® (AWS®), Infor Industry AI solutions ensure scalable, secure, and responsible AI implementation.

## Why automotive tier suppliers leaders use Infor Industry AI

**Enhance productivity and financial resilience** by unlocking AI-driven insights into operational efficiency across the supply chain.

**Accelerate the flow of work** with AI-driven workflows that empower every user, maximizing productivity and impact exactly where they work.

**Elevate what's possible** by future-proofing your business with Infor's industry experts, utilizing AI to reimagine work and gain a competitive edge.

## Explore impactful AI strategies in automotive

Get started by seeing the possibilities of infusing predictive, prescriptive, and generative AI directly into where you work.

**Elevate decisions with predictive insights**

Unlock AI-driven insights across your business with Infor Augmented Intelligence Service (AIS), an AI-managed service.

**Automate and analyze using AI-driven processes and visibility**

Eliminate manual tasks, deliver vital business insights and efficiencies with Infor Value+ solutions in less than 30 days.

**Unleash hyper-productivity with generative AI**

Empower your users to be hyper-productive in everything they do with Infor GenAI—embedded in Infor CloudSuite enterprise resource planning (ERP) solutions.

## Drive business value with top AI use cases for your business

From day-to-day tasks to critical business decisions, see where AI can boost efficiency, identify new opportunities, and mitigate risks. Tap into a robust library of Infor Industry AI use cases built with deep industry expertise.

### Elevate decisions, guided by Infor Augmented Intelligence Service

#### Cash Flow Forecasting

Drive financial resilience with realistic cash flow insights based on expenses and revenue data.

#### Job Optimization

Decide the best resource allocations based on schedules and efficiency data.

#### Smart Work Orders

Improve asset utilizations by automating task creation based on operational and maintenance data.

#### Financial Forecasting

Augment forecasting accuracy and speed, using data beyond what is possible with traditional, manual forecasting.

### Automate insight and processes with Infor Value+ solutions

#### Buyer Advanced Workspace

Help buyers identify anomalies, take timely actions to avoid stockouts and keep costs in check.

#### Vendor Performance Insights

Help procurement managers evaluate suppliers and negotiate contracts and discounts.

#### Invoice Processing

Automate AP invoices processing from retrieval to validation, reducing errors and improving AP efficiency.

#### Sales Contract Fulfillment

Proactively manage contracts and predict consumption to ensure margins are achieved.

### Unleash hyper-productivity with Infor GenAI

#### Infor GenAI Assistant

Get instant answers through contextual conversations, enabled by AI agents, to retrieve any enterprise knowledge needed for your role.

#### PLM - BOMs Management

Easily find and replace a component in a BOM structure, as well as implement mass changes to replace components in multiple structures.

#### PLM - Product Summary Report

Effortlessly share product data with a variety of stakeholders, using embedded GenAI to produce summary reports for a given PLM item, in just one click.

#### Quality - Non-Conformance Reports (NCRs)

Identify the major reasons contributing to non-conformance reports (NCRs), and which lead to supplier and customer claims.

## About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
