Infor Location Based Intelligence for Staff Backup

Healthcare

Create a safer environment for patients and staff

Ensuring a safe environment for patients and staff is a fundamental requirement of healthcare organizations. But how do staff easily notify team members when extra assistance is needed—whether to help in bathing a patient, proceeding with a patient examination, or when a violent patient situation breaks out?

While traditional nurse call systems have long provided value to patients and nursing staff in addressing these challenges, Infor® Location Based Intelligence for Staff Backup software takes these systems to the next level and improves:

- Response time and workflow
- Staff and patient satisfaction
- Staff and patient safety

“ We are leveraging real-time locating technology to provide a solution to help assure the safety of our staff and patients, which will help decrease workplace violence.”

VICE PRESIDENT OF NURSING AND CLINICAL SERVICES, CNO, SANFORD HEALTH

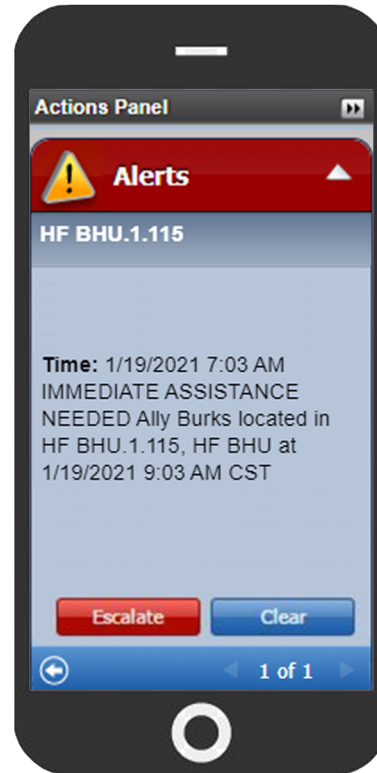

Improving notifications

With a simple badge button press, Infor Location Based Intelligence for Staff Backup allows staff to easily notify team members when assistance is needed.

This request is automatically routed to the appropriate team member or group, and the real-time location of that team member is immediately visible.

This helps:

- Quickly identify staff in need of assistance
- Easily see who is in proximity to staff in need for prompt response
- Escalate alerts to identified staff to prompt further assistance

Quickly identify staff in need of assistance.

*Note: If Staff Backup is to be used for emergent staff duress purposes, it is recommended that no other non-emergent use cases be implemented.
