Private brand retail, powered by Infor CloudSuite Fashion

Drive agility, efficiency, and innovation with Infor CloudSuite™ Fashion—a powerful suite of solutions for brands that design and retail their products, as well as multi-brand retailers. Built to streamline your brand's design, sourcing, and distribution, our solutions embed best practices and advanced capabilities to boost productivity and optimize operations to help you stay competitive.

Are you looking to:

- Navigate unpredictable consumer demand and evolving supply chains?

- Accelerate time to market for new collections?

- Streamline and automate processes to save time and money?

- Quickly adapt to shifting markets and omnichannel customer demands?

- Achieve sustainability goals while staying compliant with evolving regulations?

- Embrace next-gen technologies such as artificial intelligence (AI), generative AI (GenAI), or robotic process automation (RPA) to drive automation, innovation, and growth?

Infor CloudSuite Fashion is the answer to everything you need to run your business.

LC WAIKIKI

> " The extensive capabilities and intuitive interface of Infor PLM for Fashion mean we can continue our growth journey with the best tools and absolute confidence in our performance. Product lifecycle management is a critical process for our business, therefore our project with Infor is highly strategic. "

Şerafettin Özer
Chief Digital Officer, LC Waikiki

Realize the difference

When using Infor CloudSuite Fashion, you can realize outcomes across these areas:

- **Trend-driven design and innovation:** Rapid product development driven by consumer insights, AI, and trend forecasting

- **Agile sourcing and procurement:** Global supplier networks, cost optimization, and support for compliance with sustainability regulations

- **Demand responsive supply chain:** Stay agile to consumer demands by collaborating closely with suppliers and efficiently managing inventory

- **Efficient distribution and logistics:** Multi-channel fulfillment, automated warehouses, and last-mile delivery optimization

- **Data-driven decision-making:** AI-powered forecasting, supply chain visibility, and real-time inventory management

- **Omnichannel sales strategy:** Seamless integration across e-commerce and retail stores for a unified consumer experience

Actual results achieved by Infor CloudSuite Fashion customers

58%	**10–12%**	**15–20%**	**75%**	**1**
reduction in time to design new styles	increase in warehouse inventory accuracy	less delivery errors	of manual processes digitized	single source of data for improved accuracy

Infor CloudSuite Fashion: A complete portfolio

Infor CloudSuite Fashion offers an integrated and composable suite of solutions. It's built on a cloud platform that uses AI, machine learning (ML), and automation to enhance operational efficiency and optimize business processes. These include:

Infor™ delivers **enterprise resource planning (ERP) for apparel, footwear, and accessories** with everything you would expect, including:

- **Comprehensive ERP capabilities**, such as integrated financials, order management, inventory and supply chain management, style development and production, compliance, circular services like repair, and more.
- **Built-in, industry-specific functionality**, including a flexible style/size/width matrix, Unit of Measure (UoM) for prepacks and assortments, pricing and discount rules, lot/batch control with serialization for traceability, and more.
- **Multi-country, multi-lingual, and multi-currency** capabilities to support legal regulations.
- **Advanced supply chain planning capabilities**, with built-in inventory and supply chain planning, forecasting, execution, and more.
- **Designed to scale**, supporting businesses of all sizes—from small businesses to global enterprises.
- **Enhanced visibility and control**, with real-time insights and analytics.

Infor PLM for Fashion is a product lifecycle management solution designed to accelerate time to market for apparel, footwear, and accessories by:

- **Centralizing collaboration** for design and development teams, ensuring seamless alignment.
- **Streamlining collection planning and managing samples, materials, and trims** to reduce lead times and enhance design accuracy.
- **Optimizing sourcing efficiency** with greater visibility and control over supplier relationships and material and product costs.
- **Supporting sustainability and compliance** to meet ethical standards and evolving consumer expectations.

Infor Supply Chain Management provides additional best-in-class capabilities for organizations that require advanced network planning, warehousing, and other in-depth features beyond an ERP:

- **Infor WMS** is a best-in-class warehouse management system with AI, 3D visualization, voice processing, and analytics to enhance customer service and streamline operations.
- **Infor Supply Chain Planning** is a portfolio that boosts performance and resilience with applications for supply planning, demand forecasting, sales and operation planning.
- **Infor Nexus™** supply chain business network connects over 94,000 organizations to orchestrate global supply chain processes from sourcing to delivery and payment.

Infor CPQ (Configure, Price, Quote) provides a visual buying experience for your customers. Infor CPQ offers:

- **Dynamic product configuration** with a 3D visual configuration interface for accuracy and efficiency in creating personalized, embellished, and teamwear products.
- **Real-time pricing and quoting** to reduce errors and accelerate the sales cycle.
- **Integration with your ERP and customer relationship management (CRM)** for visibility across sales and production processes.
- **Customizable rules and workflows** to support unique processes and enhance agility.

Helping you start ahead, get ahead, and stay ahead

Solutions designed for your industry

Our solutions come with prebuilt, adaptable processes, data models, and role-based experiences— all based on proven industry best practices. This helps minimize customizations and speed up deployment for faster time to value.

Embedded on a platform for innovation

Differentiate and adapt with our powerful cloud platform. While security, integration with your ecosystem, and user management are core, the platform also delivers data and insights, AI, prebuilt automation, and custom app development to help you quickly adjust to whatever comes your way.

High value, lower risk approach

With over 15,000 Infor cloud customers, our prescriptive deployment methodolgy ensures faster and safer implementations. We emphasize collaboration, advanced tools, and governance to minimize roadblocks and keep your business aligned with key objectives. More than just a smooth go-live, our approach supports your organization throughout its entire lifecycle to maximize long-term value.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
