

Turn warehouse activity into billable revenue with Infor WMS

For 3PL providers managing complex customer contracts

Connect warehouse execution with configurable billing and invoicing.

When operational activity and billing are disconnected, teams can miss charges, spend more time reconciling work, and lack the revenue and cost insights needed to evaluate customer contracts.

Infor WMS brings billing closer to warehouse execution. Configurable rules translate billable work into charges, while review controls help teams validate output before invoices are posted.

The billing module was a huge differentiator for us.

VP, IT

East Coast Warehouse

Billing built into warehouse execution.

Configure contract rules, capture charges, review billing, and prepare invoices without relying on a separate billing application.

Capture charges

Rate by contract

Review and invoice

Automate transactional, recurring storage, and accessorial billing. Calculate recurring storage from real-time inventory quantity, weight, or cube. Record miscellaneous services through desktop or RF workflows.

Apply configurable rates by carrier, vendor, ship-to customer, transportation mode, item group, UOM, weight, and quantity. Support future-effective and seasonal rates, plus markup and discount handling.

Review pending charges before posting. Create consolidated, summary, or detailed invoices. Schedule invoice processing, print or email invoices, and export invoice and GL details through XML or ION BOD formats.

Business value for 3PL providers

Protect earned revenue

Automated charge creation helps reduce missed storage, handling, and accessororial charges.

Strengthen revenue planning

Use revenue reports and forecasts to strengthen planning and cost visibility.

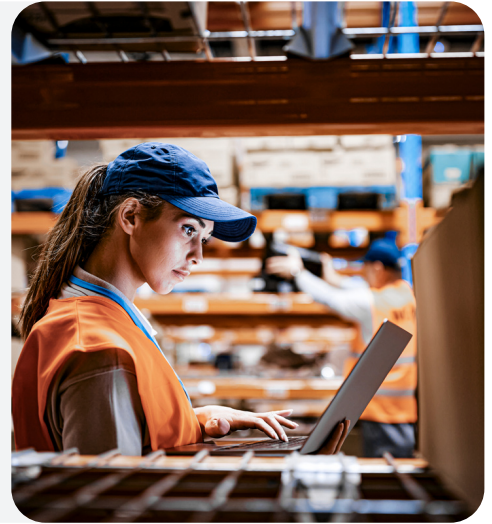

Speed invoice delivery

Print or email invoices more quickly to help reduce days sales outstanding.

Simplify billing work

Capture billable activity closer to execution, reduce manual reconciliation.

Why Infor WMS

Billing built into Infor WMS

Support complex 3PL operations without buying a separate billing solution.

Multi-facility view

Centralize billing across facilities and present a consolidated customer view.

Contract flexibility

Maintain customer-specific contracts, rates, periods, and invoice formats.

Connected financials

Move invoice and GL detail into accounting processes through supported integration formats.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
