

Infor Velocity Suite for food and beverage

Your path to becoming an
agentic enterprise

The agentic enterprise

The market shift to agentic artificial intelligence (AI) is already underway, and organizations that move now will outpace those that wait. An agentic enterprise is one where AI agents and humans work as one. Industry-specific agents execute tasks, orchestrate workflows, and make decisions across the business, under human oversight. Built to execute, not just advise.

Infor™ Velocity Suite is the catalyst. It brings together out-of-the-box industry AI agents, guided adoption, continuous co-innovation, and a predictable cost model in a single package, built on the same industry data model that powers Infor CloudSuite™ Food & Beverage.

The four elements of your agentic enterprise

1 Precise industry agents Pre-trained on your industry's data, workflows, and compliance rules. Value from day one, no months of setup.	2 Adaptive experiences Role-based workspaces and generative AI (GenAI) assistants that keep teams focused on high-priority work while agents handle the routine tasks.	3 Autonomous orchestration End-to-end workflows across systems with fewer manual handoffs. Processes run themselves consistently and efficiently.	4 Governed velocity Every human and AI action is auditable, traceable, and compliant by default.
--	---	--	---

Infor Velocity Suite: The catalyst

No other vendor combines industry AI agents, process mining, automation, prebuilt use cases, and implementation support in a single package at a flat fee. Infor Velocity Suite accelerates your journey to becoming an agentic enterprise, starting wherever you are today.

Out-of-the-box industry agents Pre-trained on your industry's data model. No configuration required. Value from day one.	Guided path to proven AI value A prescriptive roadmap from wherever you are today: on-premises, mid-migration, or underutilizing the cloud.	Continuous co-innovation Forward-deployed engineers work alongside your team. When a use case is not in the catalog, we build it with you.	Predictable total cost of ownership (TCO) Flat fee, unlimited consumption. One package: AI agents, process mining, automation, and implementation support.

Food and beverage: AI where it counts

Infor Industry AI Agents are built on the same data model that runs your operations. A planning agent in food and beverage understands shelf life, lot attributes, allergen requirements, and tank sequencing constraints, not because of prompt engineering, but because it is in the product. Here is what that means across your biggest challenges:

CHALLENGE	IN THE AGENTIC ENTERPRISE
Yield, waste, and raw material variability	AI blend and yield optimization agents monitor ingredient attributes and manufacturing parameters, proactively surface formula and process adjustments, reducing waste and protecting margin. One customer achieved €500K annual savings from improved yield.
Shelf life, traceability, and recalls	Infor Velocity Suite connects raw materials to specific product lots in one click, enabling targeted recalls and real-time traceability across the supply chain, without manual investigation or cross-system searches.
Demand volatility and supply synchronization	AI-driven demand planning accounts for promotional cycles, seasonal patterns, and ingredient constraints simultaneously. Scenario planning and push-pull scheduling keep service levels high and inventory lean.
New product development and time to market	Product lifecycle management for formulated products, integrated with AI formula optimization and regulation-compliant label generation, shortens new product development cycles by 30%.
Regulatory compliance and food safety	Automated nutritional labeling, allergen tracking, and governance, risk, and compliance (GRC) controls reduce manual effort. One customer lowered information technology (IT) demand for GRC controls by 10% while improving compliance consistency.
Complex pricing and customer contracts	AI agents manage customer-specific pricing, shelf-life rules, and delivery windows automatically, eliminating the manual coordination that drives cost and customer friction.
Manufacturing excellence and throughput	Scheduling agents apply tank, sequencing, and shelf-life constraints in real time to optimize manufacturing asset and equipment utilization. One customer eliminated a full tank per week, saving millions annually.

How we work together

Technology transformation is hard. Most vendors treat it as your problem to solve. Infor stays in the room before go-live, at go-live, and long after.

Doing the work together

Infor's forward-deployed engineers work alongside your team throughout implementation and beyond, not handing off a system and walking away.

Solutions made for you

When the use case you need is not in the catalog, our engineers build it with you. Your business shapes the outcome, not a generic template.

The art of the possible

We stay engaged after go-live. Every innovation feeds the next. Co-innovation is a continuous loop of discovery, development, measurement, and expansion.

Proven customer results

Frontier Co-op

Used Infor Velocity Suite to identify manufacturing process deviations, target training, and improve cost control. Closed a full month with zero manufacturing cost variances and unlocked approximately \$500K US in early payment savings.

9 out of the top 10

Food and beverage manufacturers globally run on Infor. Gartner® named Infor #1 in Critical Capabilities for Process Manufacturing for six consecutive years.

With Infor Velocity Suite, food and beverage manufacturers can move from AI ambition to accountable execution: optimizing every batch, protecting every margin, and turning industry intelligence into measurable outcomes. The agentic enterprise is not a future-state idea. It is the next operating model, and Infor is ready to help you build it.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
