

Derisk your cloud ERP migration with Infor Leap

Modernize faster and become AI-ready from day one

Legacy ERP wasn't built for the age of AI

Legacy enterprise resource planning (ERP) systems often hold businesses back from innovating, scaling, and competing effectively. They can also limit the effectiveness of artificial intelligence (AI), automation, and advanced analytics by trapping data in siloed systems. As organizations look to become more agile and intelligent, modernization is no longer simply about moving to the cloud. It's about creating the foundation AI agents need to work.

As markets evolve faster than ever, organizations must modernize systems that can no longer keep pace with the demands of today's business environment.

AI is only as effective as the data and processes behind it. Many legacy ERP environments rely on customizations, disconnected workflows, and fragmented data that make it difficult for AI to understand business context and act with confidence. Modernizing to Infor CloudSuite™ creates a foundation of clean, connected, industry-specific data and standardized processes, enabling AI agents to move beyond insights and help drive action across the enterprise.

That's why companies of all sizes across industries are moving from on-premises ERP to Infor CloudSuite—powered by the Infor™ Industry Cloud Platform and hosted by Amazon Web Services® (AWS®). Infor combines deep industry specificity with automation, machine learning, process mining, and industry AI agents built to act, not just advise. The result is scalability, security, and continuous innovation.

Infor Leap delivers a fast, smart, and low-risk path to modernization

For many organizations, moving to the cloud can seem complex and uncertain. Infor Leap changes that with a predictable approach to ERP modernization. This fixed-fee, fixed-timeline cloud ERP implementation program delivers a fully scoped solution with a guaranteed price and a transparent go-live date—so you know exactly what to expect, when to expect it, and at what cost. Backed by an exclusive two-year satisfaction clause, Infor Leap helps organizations realize value faster and modernize with dramatically less risk, on a foundation that's ready for AI agents from day one.

Low risk

Infor Leap minimizes implementation uncertainty with a fixed timeline and transparent go-live date. Proven, prebuilt industry processes tailored to your specific needs replace open-ended discovery, so you go live with less complexity and cost.

Low total cost of ownership (TCO)

Benefit from predictable costs with Infor fixed-fee services—no surprise charges. With a like-for-like footprint upgrade, pay no software as a service (SaaS) fee for Infor CloudSuite in your first year.

Fast time to value

Transition to the cloud quickly and smoothly with expert guidance from the Infor team. Following go-live, receive ongoing support to maximize your investment through process optimization, innovation, and user adoption.

AI-ready foundation

Infor Leap is your on-ramp to the agentic enterprise. Infor CloudSuite runs on the [Infor Industry Cloud Platform](#), so AI agents work on clean, connected data from day one. That means you can move beyond experimentation and put AI to work across critical processes faster.

How Infor Leap helps you become an AI-ready enterprise

Industry-specific cloud ERP

Infor CloudSuite solutions embed industry best practices from day one, reducing costly customizations with prebuilt processes tailored to your business. The solutions also deliver built-in AI, automation, and analytics for smarter operations.

Deployment and adoption: Uncover value

Deploy with confidence—on time, on budget, and on value—using the proven Infor Time-to-Value Methodology and fixed-fee Infor services. Optimize processes with AI-driven tools and drive user adoption and engagement through the Infor Adoption Accelerator digital platform.

Readiness: Define value

Develop a personalized cloud ERP migration roadmap with a complimentary Value Journey Workshop. Accelerate go-live with a production-ready demo tenant and standardize best practices using Infor's Industry Process Catalog.

Value realization: Surface value

Infor's support continues beyond go-live. Customer Success Executives and in-app tools help you sustain long-term value through services like [Infor CareFor Success](#) and Infor Community, with the option to add [Infor Velocity Suite](#) at preferred pricing.

"The migration to the cloud has allowed us to eliminate the bespoke developments we previously had. Our small IT team is now taking advantage of the system configurability and open architecture to meet our more specific business needs."

Pierre-Philippe Galmes
Project Director

"We don't panic when updates come. Because we were able to deploy the cloud solution with minimal customization, scheduled product releases roll out without disruption."

Aaron Roma
Director of IT

Leap ahead, land with confidence

With Infor Leap, your move to the cloud is clear and controlled. A structured migration path reduces disruption, keeps costs predictable, and gets you to value faster. Infor CloudSuite runs on the Infor Industry Cloud Platform, providing the clean, connected data AI agents need to work from day one.

Infor CloudSuite offering

- With a like-for-like footprint upgrade, pay no additional software fees in your first year
- Add [Infor Velocity Suite](#) at preferred pricing
- **Infor is committed to your success:** We earn your confidence every step of the way with an exclusive two-year satisfaction assurance

Infor Services offering

- Complimentary Value Journey Workshop with industry experts
- **Fixed-fee Infor Services:** Transparent, upfront implementation pricing with no surprise costs or risky overruns

The future belongs to organizations that can turn data into action. Don't let legacy ERP limit what's possible. Infor Leap provides a faster, smarter, and lower-risk path to ERP modernization, connecting enterprise data, and building the foundation AI agents need to deliver measurable business value.

"We couldn't even be having these conversations about AI or machine learning had we not done this project."

John Mitchell

Director of Enterprise Applications

"We've grown nearly 30% over the past three years, and a lot of that is due to how much of our business can really be driven from one software platform."

Andy Mercer

Director of Information Systems

**Functional
Devices, Inc.**

"Now that Sazon is based in the cloud with Infor, we are confident we will benefit from the latest and greatest solutions Infor has to offer."

Natalia Ortega

Director of Operations

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
