Infor Rate Shopping—TM: Real-time shipping cost options for CloudSuite Distribution

Up-to-date quotes for sales orders or proposals

Easily find the best rate for parcels or LTL shipments

Saving money is important for any business. The Infor Rate Shopping—TM solution helps deliver savings to you and your customers with a powerful transportation management rating engine. Rate Shopping—TM tightly integrates with your Infor CloudSuite ERP to present real-time parcel or LTL rates from your contracted carriers, replacing static rating table look-ups with outdated information. Keep shipping costs low for customers and keep them coming back for more.

The calculated freight also automatically flows back to CloudSuite to ensure the customer is billed what was quoted.

Compare rates from your preferred carriers

Infor Rate Shopping—TM uses order details to rate shipments by package/container size and weight as well as origin/destination, based on your current contracts with parcel and LTL carriers.

Once you select a rate, it's captured in your ERP system, and you have the option to include the quoted freight charge on the order.

Benefits for integrated, real-time shipping cost lookups

- Shop and compare shipping rates side-by-side from multiple parcel carriers
- Shop LTL and parcel shipments
- Use your negotiated rates
- Process shipping quotes without leaving your ERP system screens
- Capture rate information back to your ERP solution and order record
- Save on your total shipping spend

More quote and order efficiency—more shipping cost accuracy

Clicking on the Infor Rate Shop—TM link in your CloudSuite Distribution application begins the process and pulls your account number with various US and Canadian freight and parcel carriers to search and compare the best rates.

Sometimes you need the cheapest rate; sometimes you need the fastest service; and sometimes you need a balance. Pricing and estimated arrival information are displayed in an easy-to-read list—allowing you to quickly compare rates to find the best one for your order.

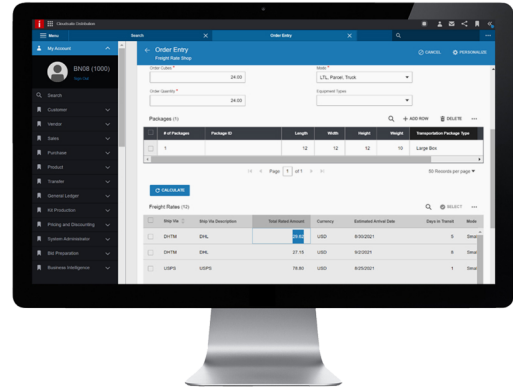

Key features

- During order entry, shop for the best rates from your contracted parcel and LTL carriers
- View comparative freight amounts based on your negotiated rates
- See estimated delivery dates for service levels
- Optionally capture the freight charge calculated during rate shopping to an order or proposal

Compatibility

- Must be on CloudSuite Distribution 11.21.9 to use Infor Rate Shopping—TM
- Currently available for UPS™, FedEx™, DHL™, LTL carriers (based on your contract rates), USPS™, and Canadian carriers Purolator™ and CanPar™

Infor Transportation Management

Rates are displayed for the selected carriers based on size/weight of the package and shipping zones.

Additional components

Note: Use of Infor Rate Shopping—TM for LTL carrier rates requires that a company have an existing license for third-party SMC3 CzarLite® (or similar SMC3 product) base rate data online.
