infor

Reliable, agile, and secure integrations with Infor iPaaS solutions

Integrations can be costly and timely, typically requiring multiple vendors to accomplish all of your integration needs. Organizations should opt for a premium Integration Platform as a Service (iPaaS) solution, which seamlessly integrates essential functionalities such as an enterprise service bus, monitoring system, Application Programming Interface (API) management gateway, and workflow engine, rather than purchasing tools from multiple vendors.

Infor® iPaaS seamlessly connects Infor and third-party systems, providing companies with the agility to meet business demands while eliminating information silos, synchronizing operations, improving data accuracy, and efficiently responding to changing requirements.

Reliable integration

Seamless data exchange across systems with guaranteed message delivery

✓ Event-driven architecture

✓ Hybrid deployment

✓ Multi-message support

✓ Fluid connectivity

Agile integration

Increased agility and efficiency to optimize processes

✓ Accelerated implementation

✓ Advanced microservices

✓ Scalable growth

✓ Reduced complexity

Secure integration

Enhanced security, compliance, and data management

✓ Robust security

✓ Transparent exchanges

✓ Lifecycle management

✓ Smart insights

Infor iPaaS solutions includes a portfolio of solutions designed to meet your integration needs as a part of Infor OS. Infor iPaaS comprises:

Infor Intelligent Open Network (ION)

Enable seamless connectivity between Infor and non-Infor applications with a scalable middleware framework that supports workflow creation, monitors critical business issues, and ensures consistent data integration

Infor API Gateway

Facilitate secure and controlled access to APIs with centralized management, ensuring authentication, authorization, usage monitoring, and streamlined operations across various Infor and third-party apps

Infor Backend as a Service (BaaS)

Create the framework for serverless, standalone cloud-native microservices, simplifying data integration between applications, managing the entire API lifecycle effortlessly, and enhancing business agility

Infor

Explore how Infor OS Platform streamlines modern enterprise innovation by unifying industry AI, Integration, Application Development, Data & Insights, and Value+ solutions. Automate, analyze, integrate, and enhance your Infor CloudSuite ecosystem with a single connected platform for innovation and AI-driven intelligence.

Infor OS				
Industry AI	**Integration**	**App Development**	**Data & Insights**	**Value+**
Boost productivity and efficiency by integrating prescriptive, predictive, and generative artificial intelligence (AI) into workflows	Break down silos and seamlessly integrate Infor and third-party systems for enhanced business visibility and agility	Simplify app creation with low-code tools to quickly design, build, deploy, and scale applications	Transform into a data-driven organization using AI-powered analytics, process intelligence, Enterprise Performance Management (EPM) software, and data fabric	Speed up innovation with pre-built Infor Enterprise Resource Planning (ERP) add-ons that address specific challenges using advanced technologies

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
