

SOLUTION OFFERING

# Accelerate your business with Infor and Amazon Web Services

## Infor CloudSuite™ Food & Beverage

**The Food and Beverage industry** is changing more rapidly than ever before, with growing compliance regulations and the requirement to manage the supply chain with end-to-end traceability. Layer in the need to monitor safety protocols, coordination of manufacturing operations, and product development cycle management. No wonder the industry is challenged to rapidly future-proof businesses and adapt to the evolving environment.

Consumers want to know more about their food—where it comes from, and most importantly, is it safe? It's difficult for any organization, no matter the size, to manage the vast quantity of interrelated variables. How do you improve food safety, minimize waste, and at the same time, create a more transparent food supply chain?

**The right ingredients for transparency and growth** are found in the innovative Infor CloudSuite™ Food & Beverage solution built on Amazon Web Services (AWS). With core enterprise resource planning (ERP) capabilities, every critical process gains cross-departmental integrations, equipping food and beverage manufacturers with the flexibility they need to transform to meet modern industry dynamics.

With constantly changing material availability, seasonality constraints, volatile demand, and an increasingly complex supply chain, manufacturers who utilize Infor and AWS are empowered to optimize all operations end-to-end—from forecasting to production to customer delivery.

### Food safety, quality, and compliance

Earn trust and build brand value for reliable food safety with visualized end-to-end traceability and rapid recall capabilities.

### Business intelligence and analytics

Using automation and machine learning, connect teams and applications across the enterprise via a trusted network with analytics and insights to inform smarter decisions.

### Operational efficiencies

Leverage the power of AWS infrastructure and services to run your business with the most flexible and secure cloud computing environment available today.

### Transparency in manufacturing

Ensure regulatory and customer requirements are met throughout the product development cycle and provide consumers with details on their food, from farm to fork.

## Innovation, safety, and sustainability in food manufacturing

Powered by AWS, Infor CloudSuite™ Food & Beverage makes informed business decisions possible with connected data and analytics across every department and site, even globally. Designed with built-in industry functionality and prepackaged workflows, organizations can extend ERP capabilities from procurement to warehouse and inventory management. Operations are interconnected with data, ranging from product lifecycle to supply chain planning and extending to sales and finance.

Consumers demand food and beverage product innovation for more than great taste. They want end-to-end food supply chain visibility to verify safety and sustainability. With Infor CloudSuite™ Food & Beverage, manufacturers can automate food safety processes, perform regular testing, and meet regulatory and customer requirements with system-directed quality checks and tests. By taking a proactive approach to quality and safety, should the need ever arise, you can quickly identify the root causes of food safety issues and perform accurate, targeted recalls.

The food and beverage industry is evolving daily. Infor CloudSuite™ Food & Beverage on AWS gives you access to a quick-to-deploy and easy-to-use digital operations platform that enables business operations and innovation transformation without disruption.

**Built for the Food & Beverage industry. Built in the cloud.**
