

AI-driven PO automation, powered by Infor and SourceDay

Extend ERP value with intelligent automation and real-time visibility across the purchase order lifecycle

For manufacturers and distributors using Infor™ enterprise resource planning (ERP) systems, Infor and SourceDay deliver artificial intelligence (AI)-driven insights and automation that help teams proactively address up to 70% of inbound supply issues before shipment—by keeping purchase order (PO) data accurate, synchronized, and actionable from issue to inventory.

Built for Infor ERP users

Infor's only certified supplier portal

Certified integrations with:

- Infor CloudSuite™ Industrial
- Infor CloudSuite™ Distribution
- Infor XA
- Infor LN
- Infor VISUAL™

Proven at scale

Infor chose SourceDay to replace its legacy vendor portal because it is the best-in-class supplier portal for manufacturers and distributors.

100+

manufacturers and distributors

Over \$5 billion

in direct spend processed every quarter

100,000+

active suppliers worldwide

Over 90%

supplier adoption, driven by onboarding, training, and support

Designed for adoption and results:

World-class supplier onboarding and enablement

"No-login" interactive emails

Real-world customer success across manufacturing and distribution

Key benefits of Infor and SourceDay

Infor's certified supplier portal for manufacturers and distributors who need to automate their PO lifecycle in order to:

- 1 Help operations and procurement teams keep up with growth
- 2 Stop production issues that prevent on-time, in-full (OTIF) delivery to customers
- 3 Improve on-time delivery (OTD) inbound inventory
- 4 Reduce inventory costs and buffer stock
- 5 Improve invoice payment process to prevent mismatched invoices
- 6 Increase visibility to proactively manage supplier performance
- 7 Prevent bad PO data in their ERP

A supplier portal built for adoption

World-class onboarding, training, and support

100K suppliers worldwide

"No-login" interactive emails

Easy-to-use web interface

Direct integrations via API and EDI

Multiple customer accounts in one place

Localized support outside the US

Where AI makes a difference

Infor and SourceDay embed AI directly into purchase order and supplier collaboration workflows, helping teams surface risk earlier and reduce manual effort.

AI-driven capabilities include:

- Early detection of supplier risk, including lead time changes, price variances, late acknowledgements, and delivery delays
- Intelligent alerts and exception management that highlight what needs attention and why
- AI-powered agents and automation that assist with routine manual steps across procurement and related operational processes

This applied, embedded AI approach helps teams act sooner, reduce supply chain disruptions, and protect on-time delivery without adding complexity.

Case study: SPM Oil & Gas

SPM Oil & Gas faced volatile demand, constant PO changes, and costly delays. By implementing and integrating SourceDay with Infor, SPM automated supplier collaboration and kept ERP data synchronized in real time. By streamlining communication with suppliers, SPM prevents late deliveries and expedites. It also reduced invoice processing backlogs from \$6 million to \$2 million and accelerated PO invoice reconciliation by 70%.

“It saves time and money and puts all the data in one place. Now it’s one of the first tools I show new buyers.”

Jessica Ross
Purchasing Supervisor

KEY RESULTS

Zero

Production delays

70%

Increase in PO invoice reconciliation

Case study: Sportsman Boats

Sportsman Boats was experiencing rapid growth and sought to gain control over supply chain chaos and unpredictable supplier communication. By integrating SourceDay with Infor, it automated procurement workflows and achieved a one-week safety stock target—the lowest in years. With 70% of suppliers onboarded, the team reduced costly expedites and avoided production downtime.

“SourceDay has been a huge part of us being proactive. Without it, we’d be at a disadvantage.”

Cole Wilson
Systems Manager

Case study: Viking Yachts

Viking Yachts needed to streamline supplier engagement and gain real-time PO visibility. By adopting SourceDay with Infor, Viking increased supplier acknowledgment rates to 96% and response rates to 88%. With automated workflows, the purchasing team now tracks every PO line item with ease, doubling their OTIF delivery rate. Teams can manage open orders proactively, letting them optimize inventory storage and plan production schedules accurately.

“Having up-to-date PO information readily accessible in SourceDay means that I can see everything. Getting this kind of insight manually is difficult and time-consuming.”

Case study: JBT AeroTech

JBT AeroTech tackled chronic late and missing parts by improving supplier communication with SourceDay and Infor. The new approach reduced late parts by 76%, allowing JBT to increase OTIF delivery to customers to 89%—up from 69% prior to implementing SourceDay. Supplier on-time delivery rose 31%, which made it possible for the team to cut safety stock for one supplier by \$800,000.

“When all was said and done, we found the #1 issue to be communication. Our suppliers weren’t communicating well with us, and we weren’t communicating well with our suppliers.”

Terri Decker
Supply Chain Performance Manager
