Infor LN Prebuilt ERP for Make-to-Stock Manufacturers

Make-to-stock manufacturers require multiple levels of optimized inventory across a variety of locations and an extensive distribution network. Yet current ERP systems often lack visibility across the supply chain, leading to spiraling costs and unmet customer demands. With Infor LN Prebuilt, we're making it easier to address those concerns.

Inventory-driven production needs a tailor-made ERP

When it comes to ERP systems for MTS manufacturers, there are often only two choices: a robust system that meets your needs but is complex and time-consuming, or a simplified solution that is too basic and lacks industry-specific functionality. What's missing is a robust, industry-specific, and user-friendly ERP system that can be implemented easily out of the box.

Infor LN Prebuilt is pre-configured with discrete manufacturing industry-specific functionality, based on best practices that were identified over three decades of projects delivered to more than 70,000 customers worldwide. The solution is based on Infor CloudSuite™ Industrial Enterprise, offering access to world-class workflows, alerts, document management, and industry analytics.

Infor LN Prebuilt at-a glance

- Industry-specific ERP for MTS manufacturers
- Implementation in just 4 months
- Special fixed cost with a defined scope
- Pre-configured for manufacturers

Keep pace with innovation specific to your business!

As your business grows and your needs change, Infor LN Prebuilt grows with you. It allows you to continuously innovate without needing to hire expensive consulting services or migrate to a new version or other solution.

Key features of Infor LN Prebuilt

• Connect and exchange data

Easily integrate Infor and third-party enterprise systems while eliminating information silos with Infor Intelligent Open Network (ION), Infor's advanced middleware cloud platform pre-configured with Infor LN Prebuilt.

- Gain the flexibility to make complex webs of enterprise systems work together
- Optimize return on technology investments with long-term sustainability
- Trust that your network will remain stable even if an application is upgraded, replaced, or fails
- Access information in real-time with less costly or complex system maintenance

• User experience and collaboration

Build a centralized space for team collaboration, business process improvement, and contextual analytics with Infor Ming.le®, Infor LN Prebuilt's intelligent portal.

- Establish a common workflow and organize conversations into enterprise-wide streams
- Reduce procedural processes by allowing employees to share key screens, data, and attachments

• Business process flows

Benefit from the built-in Infor Industry Process Catalog (IPC) for MTS companies, with pre-configured processes and solution behavior.

- Choose from core industry-leading business processes, along with application configurations, an implementation playbook, tools, and templates
- Drive predictable results through a prescriptive, repeatable process that lowers risk and increases time to value

World-class infrastructure

The Infor cloud is built on Amazon Web Services (AWS), the market leader for cloud-based infrastructure. This partnership offers world-class security, safeguarding your customer data while enabling business continuity and resiliency. Infor CloudSuites™ are designed to run seamlessly across multiple availability zones with active/active high-availability clustering, so customers experience minimal impact from any unplanned outages or system loads.

Our cloud-based digital platform ensures you'll always have the latest features and functionality, based on industry best practices, using the highest-level security protocols available.

Leverage simplified, industry-specific functionality

Built with a specific, focused scope, Infor LN Prebuilt provides a user-friendly simplified solution with fewer menus, screens, and fields. The tailored functionality is provided in six pre-loaded packages for your most common operational needs:

Sales

- Customer management
- Product catalog
- Sales order

Procurement

- Supplier management
- Material management
- Requisition
- Quotation
- Procurement order

Manufacturing

- Items and bill of materials
- Routing
- Job shop orders
- Subcontracting
