

## SOLUTION OVERVIEW

# Infor Nexus Financial Supply Chain Management

## Automate and collaborate to gain visibility and agility

Infor Nexus™ allows for collaboration, visibility, and transaction automation between trading partners. It increases agility, reduces costs, and minimizes risk.

Financial Supply Chain Management automates the supply chain transaction process on a multi-tenant, multi-enterprise platform in the cloud. It allows companies to negotiate and confirm orders with suppliers and trading partners, create electronic fulfillment documents, and track inventory and payments in real time. The solution ensures that all parties are looking at the same instance of the data—reducing the chance for error.

## Infor Nexus Financial Supply Chain Management

- **Order Collaboration**—A single view of order data between companies and their suppliers. Confirm or negotiate order terms across multiple orders and items simultaneously.
- **Invoice Management**—Automatic creation of electronic invoices, packing lists, and other fulfillment documents from order and shipping data. Create a single format and data source to create both commercial and customs invoices, and deliver documentation to brokers.
- **Payment Management**—Rapid payment approval and notice of discrepancies, with a clear picture of cash flows and expected payment dates to suppliers. Automatically compare orders, invoices, packing lists, proof of delivery, inspection certificates, and goods receipts, and ensure timely payment to suppliers.
- **Deductions Management**—Electronically managed deductions with support for image and document attachments. Configure to company deduction rules and automatically take deductions on future invoice payments, expediting recovery.
- **First Sale Automation**—Automated creation of first sale documentation. Validate documents for accuracy and completeness and electronically provide data directly to the broker.
- **Supply Chain Finance**—A network of finance providers ensures suppliers have the capital they need to execute your order. Remove capital-related costs and risk from the supply chain.

## Key features

Automated creation and delivery of orders, invoices, and other documents

Collaboration, negotiation, and confirmation of key order terms across entire spend

Configurable and automated document checking, payment decisioning, and execution

Automated deductions creation and management

Configurable, multi-level approval workflow

Integrated suite of supply chain finance solutions

## Benefits

Lowers processing costs with automation

Increases product margins with better supplier performance

Improves cash management through accelerated chargeback recovery, reduced FOB and duty costs, invoice discounting, and automated first sale transactions

Reduce AP cycle times and costs by enabling straight through processing

Provides payment confidence and visibility to suppliers

Enables working capital strategies while ensuring suppliers' access to cash

## About Infor Nexus

Infor Nexus™ is the leading end-to-end global supply chain platform, helping companies achieve unmatched visibility for over 20 years. Infor Nexus™ connects a network of over 85,000 brands, retailers, manufacturers, suppliers, logistics providers, and banks on a single-instance network platform to orchestrate global supply chain processes seamlessly from source to delivery and payment. Companies streamline their operations, eliminating inefficiencies and waste while gaining data-driven insights and optimising the flow of capital for improved agility, resilience, and sustainability.
