

Infor Velocity Suite: All-inclusive pricing

All-inclusive AI. One flat fee.

An agentic enterprise puts artificial intelligence (AI) to work wherever it adds value, working as your trusted partner. Infor™ Velocity Suite lets you adopt AI where the value is highest, move at the pace your business demands, and scale with cost predictability on a governed platform built for your industry. It is deliberately priced to provide **predictable total cost of ownership** that makes it easy for customers to adopt AI across their enterprise with no surprise costs.

Infor Velocity Suite is priced so your teams can focus on using AI to deliver better outcomes for the business. You pay one flat fee for the organization, aligned to business outcomes, not usage.

No per-agent fees

No use-case calculator

No surprise bills

The problem with usage-based AI pricing

When every agent, document, and transaction adds to the bill, teams hold back to control costs. Infor Velocity Suite removes the running meter, so you can scale AI on value, use case adoption, and business outcomes.

	Typical usage-based AI	Infor Velocity Suite all-inclusive
Billing	Costs rise with each agent, transaction, or token	Pay one annual fee, known up front and aligned to outcomes, not usage
Cost predictability	Costs fluctuate with adoption and are difficult to forecast	Plan with a fixed, known investment with no surprise bills
AI scalability	Growth comes with cost uncertainty	Expand AI access and usage without added cost
Team impact	AI access is rationed to avoid higher spend, potentially limiting rollout	Deploy AI wherever it adds value, enabling broader adoption across departments and roles

What's included

Infor Velocity Suite delivers everything you need to become an agentic enterprise for one flat fee. Every Infor AI agent, automation, process insight, and industry-specific use case is included with unlimited access and usage—all purpose-built for your industry.

Included, with unlimited access and usage

Unlimited AI
agents—prebuilt agents
and custom agents
you create

Unlimited process
insights—identify process
gaps and bottlenecks

Unlimited intelligent
workflows, automations,
and industry use cases

Infor Velocity Suite includes a generous AI token allowance designed for real-world enterprise consumption, far beyond what even our most active customers use today. This isn't a meter waiting to run out; it's a fair-use allowance sized to ensure every customer has the capacity they need, with headroom to grow, while maintaining a stable, high-performance platform for everyone.

With Infor Velocity Suite, you also have access to **Infor's forward-deployed engineering (FDE) practice**—a team of experts who work alongside you to identify, build, and deploy AI use cases in weeks. Learn how in [How Infor is helping customers get real value from AI](#).

Why our pricing works in your favor

Benefit	What it means for you
 Build your business case	Map your full AI adoption roadmap up front, not just the first use case. Then build the business case for continuous, compounding value.
 Budget once	Keep your total cost of ownership predictable, with no usage-based increases and no end-of-quarter surprises.
 Experiment without trade-offs	Try more AI use cases across teams with a high-capacity allowance that supports broad adoption, without penalizing teams for every agent, workflow, or transaction.
 Scale freely	Deploy the next agent and the next use case at no additional cost, so you can apply AI everywhere it earns its place.
 Integrate with your systems	Connect to your existing environment through Infor Velocity Suite's open architecture, so you can bring AI into more workflows without being limited by your current setup.

How the model works for you

Infor Velocity Suite bundles the technology, capacity, and expertise into a flat fee, making AI accessible while keeping your total cost of ownership predictable. Infor runs the platform, provides AI experts to innovate with you, and carries the underlying consumption cost, so your investment stays predictable while your AI value grows.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
