

# Harness the power of data

Generating useful insights from all of the data your organization collects is an ongoing challenge, especially when traditional data warehouses remain slow, complex, and expensive.

For organizations that are ready to embrace modern technologies, your data can produce valuable insights to help drive productivity quickly and inexpensively. **Are you ready?**

### Automated data refinement

- Easily connect live data or extract data from any source
- Unify data from multiple source systems
- Utilize a patented solution that automates the building of a business-ready data store

### Agile semantic layer

- Use common and reusable enterprise metrics and business rules
- Enable local execution with global governance
- Work independently and build collaboratively

### Smart analytics

- Create a powerful, AI-enabled, self-service user experience
- Automatically discover insights at speed and scale
- Augment decision-making to extend the value of enterprise data
