

Leading financial transformation

Finance is evolving: Today's CFO leads with AI-powered insights

Financial stability is the foundation of mission-driven care, clinical innovation, and strategic growth. AI and automation can unlock operational efficiencies and deliver actionable insights, but legacy systems are a growing liability. In today's healthcare environment, real-time visibility and predictive analytics are essential for informed decision-making and rapid response. Without modern, AI-powered technology, healthcare organizations face more than missed opportunities – they risk undermining financial performance and the very mission their communities depend on.

Healthcare's most complete cloud ERP with leading core financials

Infor CloudSuite™ Healthcare is a purpose-built cloud ERP solution that unifies financial, supply chain, payroll, and clinical data and uses AI-powered processes to deliver sharper financial insights, smarter capital allocation, and rigorous cost containment for sustained strategic growth. Unlike comparable vendors that rely on complex integrations and costly third-party point solutions, Infor™ provides a complete, prescriptive, care-connected ERP with AI-driven innovation for healthcare built in. Industry process catalogs, prebuilt integrations, and compliance tools reduce implementation effort in comparison to traditional ERP vendors, reducing cost and risk while accelerating results.

Infor is recognized as the leader in core financials in recent leading analyst research, validating our strength in delivering advanced financial functionality with speed and confidence.

Infor delivers financial clarity & control for a healthy bottom line

- 1 Real-time financial insights and audit readiness**
Access predictive analytics, built-in compliance reporting, and complete audit trails to improve decision-making and reduce regulatory risk.
- 2 Innovate faster with AI built for healthcare**
Uncover insights to speed decision making, automate time-consuming manual processes, and increase productivity while maintaining data security and governance.
- 3 Automated financial close management**
Shorten monthly and annual closing cycles with built-in task management, automated journal entries, real-time consolidations, and embedded compliance controls.
- 4 Cash and forecasting automation**
Improve cash visibility and forecasting with automated reconciliation, integrated bank connectivity, and AI-assisted cash position analysis for stronger liquidity management.
- 5 Delivered data integration with EHR**
Powered by Infor Cloverleaf, Clinical Bridge syncs ERP data with clinical data in your EHR system, eliminating tedious manual data entry for providers and reducing IT overhead.

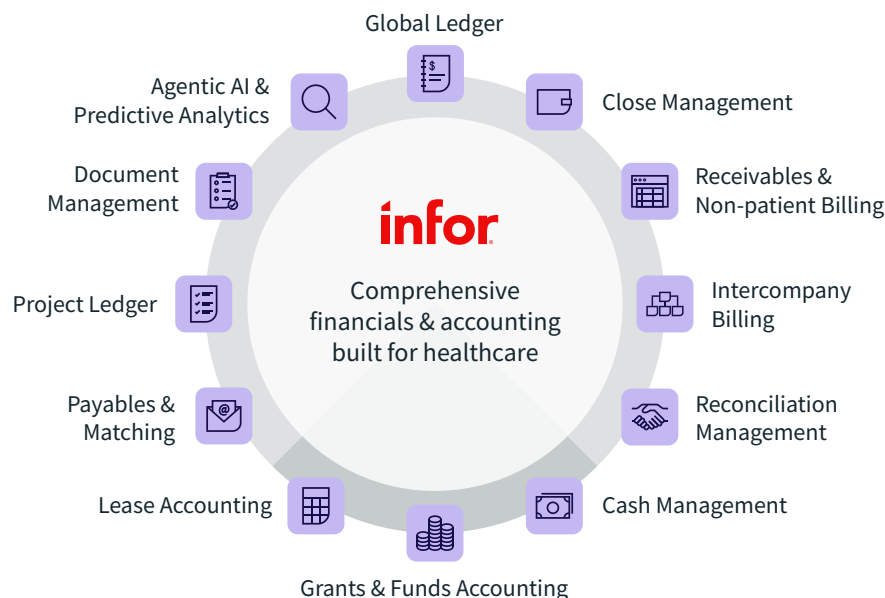

“One of the big challenges for the future of healthcare is to do more with less resources. Partnering with Infor has really helped us take advantage of technology and automation to be more efficient and save time, so we can reduce the demand for resources as we grow.”

Tom Legel
Chief Financial Officer
Confluence Health

Close the books faster and drive smarter, strategic growth

Advanced finance and accounting capabilities help healthcare providers achieve real-time financial visibility, automate critical processes, maintain rigorous compliance and make data-driven decisions faster - driving improved efficiency, accountability, and strategic impact. Centralized document management built into ERP eliminates third-party tools, ensures secure access, maintains version control, and streamlines audit readiness.

“Infor is bringing the ability to reduce the number of bolt-on applications needed to get the job done. This brings dollar savings and a reduction in the number of interfaces.”

Real results with AI-driven innovation built for healthcare

With automated, connected data, artificial intelligence helps healthcare supply chains work faster and smarter. AI-powered workflows identify process slowdowns, take over repetitive work, and keep operations running smoothly - so your team spends less time on tedious tasks and more time improving support for clinicians and patients.

Pinpoint and diagnose bottlenecks

Identify process slowdowns and areas for improvement before they impact productivity.

Save time by automating routine tasks

Eliminate manual work and gain vital insights and efficiencies in the first month.

Make compliance & supply decisions faster

AI-powered insights reduce risk and help staff make smarter, faster decisions.

Confluence Health eliminated hours of manual work through automation of two critical supply chain processes with Infor Velocity Suite: vendor compliance checks against the Office of the Inspector General (OIG) exclusion list, and AP invoice automation. Their innovation journey has just begun – many more AI-powered healthcare processes can further enhance operational efficiency.

Stace Webley, financial systems support manager, said, “We expected it would take at least 6 months to see results, but within the first month we reallocated a full FTE and saw a noticeable increase in employee satisfaction. That quick turnaround is what we’re most proud of.”

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
