

Agile logistics for LSPs and 4PLs: Smarter, faster, more resilient

As logistics service providers (LSPs) and fourth-party logistics (4PLs), it is essential to react swiftly and seamlessly to ensure containers reach their destinations on time. Efficient origin operations management is crucial, as is the ability to boost productivity and refine decision-making processes. Achieving these objectives requires end-to-end visibility and access to the latest artificial intelligence (AI) and machine learning (ML) technologies.

Infor Nexus™, the leading global supply chain management platform, empowers organizations like yours to make the right decisions with precision at the right time. By leveraging advanced tools and insights, you can enhance operational efficiency and maintain a competitive edge in the industry.

Maximize your potential

Infor Nexus enables you to minimize transportation costs, optimize inventory availability, and increase efficiency across your supply chain.

Deliver exceptional service with innovative, value-added solutions

- Offer value-added services like purchase order (PO) and origin consolidation management
- Establish a globally visible, end-to-end control layer
- Connect the entire supply chain ecosystem on a unified network
- Leverage data-driven insights for more accurate and reliable estimated arrival times (ETAs)
- Drive innovation at the right pace with customer-tailored solutions

Streamline processes and improve productivity

- Enhance efficiency with supply chain visualization and collaboration
- Develop proactive, prescriptive processes using the Internet of Things (IoT) and AI
- Drive greater customer value through collaboration and orchestration
- Increase agility to navigate supply chain disruptions
- Use data-driven insights to uncover new business opportunities

Turn vast data into actionable insights for smarter decisions

- Gain complete visibility into all global ocean container movements
- Leverage management dashboards and analytics for deeper insights
- Develop a carrier management program using scorecards and analysis
- Ensure accurate, real-time status updates and milestone tracking
- Enhance procurement and contract management efficiency

Key features

Purchase order origin management

Optimize global transportation by synchronizing systems and partners across all modes, enhancing reliability, cost visibility, and efficiency:

- Customer order integration and creation
- Shipping order management
- Supplier shipping order portal
- Customer commercial documents (e.g., packing list and commercial invoice)
- Receipts and dynamic allocation
- US Importer Security Filing (ISF) generation and submission
- Verified Gross Mass (VGM) compliance
- Manifest generation and submission
- Forwarder's Cargo Receipt (FCR) generation
- Dynamic predictive estimated time of arrival

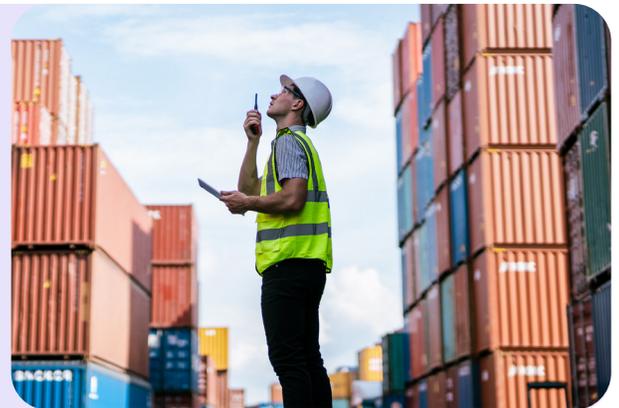

Supply chain control tower (Control center)

Enhance speed, agility, and responsiveness with high-fidelity visibility, intelligence, and execution capabilities:

- Gain real-time, end-to-end visibility into orders, shipments, and inventory
- Unlock deeper insights with advanced supply chain data visualization
- Receive proactive alerts on order delays, shipment disruptions, and stock shortages
- Leverage intelligent decision support for informed, context-aware choices
- Enable rapid responses through network collaboration and streamlined workflows
- Cut costs by optimizing routes, transportation modes, and carriers
- Collaborate seamlessly to execute transportation requests, improving capacity and service quality
- Track and trace shipments and orders with real-time data

Unlock end-to-end shipment visibility and empower your customers with smarter freight management strategies.

About Infor Nexus

Infor Nexus is the leading end-to-end global supply chain platform, helping companies achieve unmatched visibility for over 25 years. Infor Nexus connects a network of over 90,000 brands, retailers, manufacturers, suppliers, logistics providers, and banks on a single-instance network platform to seamlessly orchestrate global supply chain processes from source to delivery and payment. Companies can streamline their operations, eliminating inefficiencies and waste, gaining data-driven insights, and optimizing the flow of capital for improved agility, resilience, and sustainability.
