Infor Cloverleaf Cloud—built on AWS

Healthcare

A unique combination

The unique power of Infor® Cloverleaf, built on Amazon Web Services® (AWS®), isn't just the trusted functionality and power of Cloverleaf® as an integration platform. Built for the cloud, with fine-tuned, performance-enhancing capabilities, Cloverleaf helps healthcare organizations increase agility and improve the business. Powered by Infor's innovative cloud technologies and built to seamlessly work with AWS' world-class capabilities, Infor Cloverleaf Cloud gives organizations the flexibility, responsiveness, and scalability they need to stay ahead in an environment that calls for continual innovation and new approaches to healthcare technology.

The key ingredient for healthcare integration in the cloud

Achieving cloud-ready performance demands more than servers and software; it takes a unique combination of technologies and services that are designed, built, and optimized to satisfy mission-critical, enterprise-grade integration requirements. Infor Cloverleaf Cloud, built on AWS' cloud infrastructure and network services, delivers this, along with industry-specific application design. Organizations get the reliability, security, and scalability needed to trust healthcare data to a cloud-based integration platform.

Get the reliability, security, and scalability healthcare organizations need to trust integration to the cloud.

A new recipe for success in the cloud

Infor has been delivering cloud-based enterprise solutions for more than 10 years, and our healthcare integration solution for more than 20 years. These experiences have helped us perfect the technologies and core services to deliver the performance, security, and breadth that healthcare organizations require for interoperability in the cloud.

Superior capabilities

Continuous innovation—With ongoing upgrades and testing included as part of our commitment to Infor Cloverleaf Cloud, organizations can trust that they'll have the latest versions of the Cloverleaf application and the operating system it runs on. By experiencing the cloud-enabled strategy of Infor Cloverleaf Cloud, organizations will be up to date with the latest innovations and opportunities to realize the significant value of integration in the cloud.

Lower cost of ownership—Infor Cloverleaf Cloud doesn't have any on-premises hardware or software costs, so it reduces the high capital expenditure that typically accompanies major integration platform changes or other operational costs. And because Infor Cloverleaf Cloud leverages AWS' industry-leading security measures, organizations will see lower security costs and can rely on a reduced risk of data loss or security breaches. In addition, with lower requirements for hardware and software maintenance, organizations can reallocate IT costs to other projects—realizing greater value for the integration team and innovation initiatives.

Faster time to value—Organizations can spend more time innovating, while minimizing administrative overhead with Infor Cloverleaf Cloud. The highly available configuration, based on AWS best practices and Cloverleaf architecture, results in less time optimizing hardware and software practices. By minimizing the time spent on hardware optimization, teams can spend more time working on projects that bring the organization greater value and benefits to patient and clinician experiences.

The formula for new opportunity

We've chosen to work with AWS because it offers unmatched strength and sophistication at delivering cloud infrastructure. Infor's innovative technology framework enhances the AWS service portfolio with capabilities that support the healthcare enterprise—including automated logging and monitoring, and a full range of industry-grade cloud infrastructure elements. AWS perfectly complements Infor's healthcare integration platform due to its superior delivery model, competitive cost structure, and proven record of operational excellence.

Improved results

Superior auditing and compliance—For the healthcare industry, compliance and audit needs are critical requirements. Because Infor Cloverleaf Cloud supports compliance at the application level and AWS maintains high compliance standards for the underlying infrastructure, Infor Cloverleaf Cloud customers gain an essential advantage in attesting to and complying with detailed industry standards such as HIPAA.

Scalability and resiliency—Built on modern, secure, reliable product architecture, Infor Cloverleaf Cloud is easy to scale based on growth. The resilient and highly available AWS infrastructure and AWS security best practices provide peace of mind for the critical integration needs of today's healthcare organizations.
