Unlock the full potential of your data with Infor Nexus Data Mesh

In today's dynamic and fast-paced business environment, leveraging supply chain data is critical to driving smarter, faster decision-making. As the majority of supply chain processes and data sit outside your organization with your network partners, timely access to network data is critical.

Infor™ Nexus Data Mesh is a transformative, unified platform that empowers business users and data professionals to unlock actionable intelligence from the transactional data managed on the Infor Nexus platform. By creating a scalable, self-service foundation, it accelerates insight generation, fosters seamless data exchange, and delivers personalized data experiences to ensure agility.

What Infor Nexus Data Mesh offers

Data mesh consolidates all the supply chain data sources managed on the platform, making them accessible to your users for gaining insights.

Key capabilities include:

Self-service infrastructure	Customizable datasets	Analytical dashboards	Operational reporting	Data export
Information technology (IT) teams and data analysts can quickly build and deploy data products and capabilities to business users, accelerating delivery and reducing time to value	Create custom datasets with a robust query expression language to empower user-driven analytics	Build dynamic dashboards to visualize performance, uncover trends and anomalies, and explore data through interactive drilldowns and multi-dimensional views	Quickly develop operational reports against curated large datasets	Seamlessly export key data to your data warehouse or business intelligence systems to unify network and enterprise data, and accelerate analytics and artificial intelligence (AI) initiatives

By simplifying data preparation and reducing manual effort, Infor Nexus Data Mesh accelerates insight generation and equips businesses to respond to evolving operational needs with confidence.

Core benefits

Faster, smarter decision-making

Enable every team member to turn data into actionable insights at scale, enabling quicker, data-driven actions

Improved supply chain efficiency

Identify bottlenecks, optimize fulfillment, and streamline operations

Increased business agility

Rapid deployment and flexible tools enable faster responses to changing business needs

The data mesh value

Infor Nexus Data Mesh redefines how organizations unlock the strategic potential of supply chain network data. By providing a unified, scalable, and user-friendly platform, it empowers both technical and business users to make data-driven decisions with accuracy. From real-time operational analytics to long-term strategic insights, data mesh is the foundation for smarter, faster, and more agile supply chain management.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
