

Start your AI transformation with Infor

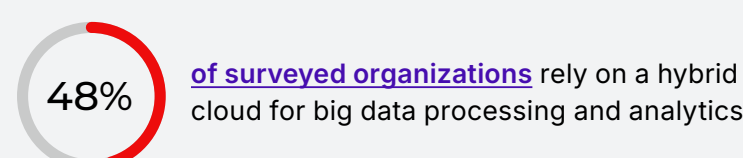

Discover the proven benefits of moving to the cloud

Access to AI tools is no longer the primary barrier to adoption. Instead, organizations are struggling with challenges related to data, systems, and integration—with more than 30% reporting data-related concerns. To transform data into a trustworthy, clean source for enterprise AI to work from, organizations first need a proven operating platform.

Explore the real-world impact of moving to the cloud

To maximize the potential of your data in your AI transformation journey, moving to the cloud is a surefire route that many organizations take.

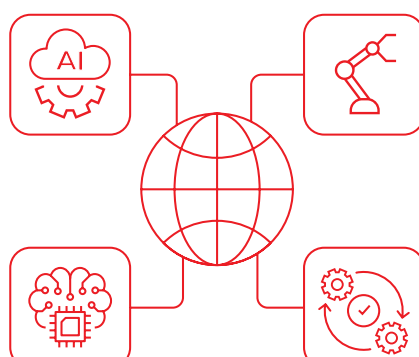

Infor provides a true multi-tenant cloud environment that helps you to unify your data, providing enterprise AI solutions with reliable visibility and actionable insights. Here are some of the proven benefits of the platform:

Embedded AI-readiness

Building a strong cloud platform foundation enables you to introduce AI solutions that help you maintain a competitive edge.

Global leader in towing and recovery equipment, **Miller Industries**, upgraded to Infor CloudSuite Automotive. In doing so, they could implement **Robotic Process Automation (RPA)** and **GenAI** capabilities that understood their business-specific needs to **supercharge efficiency**.

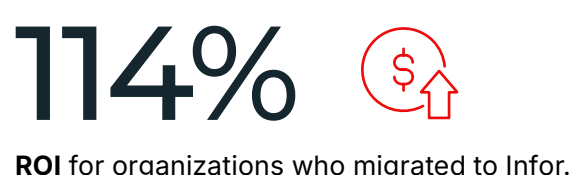

The automated process brings us the advantage of processing orders faster, more accurately, and more reliably, which translates into customers getting a good service from Miller Industries."

Sias Reyneke, CIO at Miller Industries

Real returns

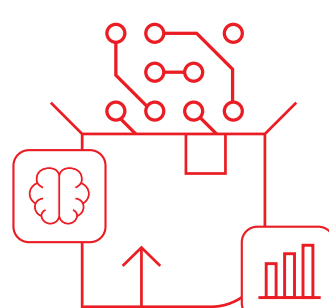

By partnering with Infor, you can embark on your AI journey with confidence, knowing your data insights are coming from a cloud platform that's proven to deliver.

Proven productivity

Infor helps you supercharge productivity by combining real-time insights for faster decision-making, and advanced AI solutions for greater operational efficiency.

Through Infor, leading food packaging manufacturer **Oliver Packaging** could implement **Machine Learning**, which leverages its **unified data** to better forecast demand and drive significant **productivity improvements**.

This solution is saving me 90% of time taken to analyze orders, so I can move into different items like strategic planning or helping my team."

Sara Patrick, Sales Analyst at Oliver Packaging

See value from day one with Infor

Digital transformations can feel overwhelming, but worthwhile returns can come with the right partner. Infor Velocity Suite is an all-inclusive AI offering that pairs with Infor ERP Cloud solutions. Velocity Suite provides a path to an agentic enterprise, where AI agents collaborate with your people from day one to deliver measurable value.

Discover how to turn your enterprise AI transformation into real results by speaking with an Infor representative.
