

Preparing your enterprise for an AI Transformation

How connected data, industry context, and secure operations enable your value-guided AI journey.

AI adoption is shifting from a competitive advantage to a strategic imperative. But in a world where [95% of AI projects fail](#), successful implementation hinges on preparation—including strong data,

industry context, and secure operations. **To see real value from your enterprise AI investments, here's where you should first focus your attention.**

Laying the ideal foundation for AI adoption

Data that delivers

AI is only as good as its data.

[Infor research](#) has found that just 25% of organizations strongly agree their data is mature enough to support reliable AI. Without this trusted, well-structured information, enterprise AI solutions can become unreliable and inefficient.

By implementing **Infor Industry Cloud Platform**—a multi-tenant cloud platform built for industry-specific AI, analytics, and integration—you can get consistent, high-quality data that gives AI a complete, reliable view of processes to:

- **Enable smarter decision-making** for continuous innovation
- **Access actionable insights** to improve agility
- **Drive operational excellence** across all business units

Embedded industry understanding [Gartner has found](#) that organizations investing in AI are differentiating themselves by developing specialized GenAI models tailored to their industry—a move that has benefits across a range of AI solutions. Alongside better-connected data, Infor ERP Cloud Solutions brings industry-specific capabilities that help you:

- **Address unique challenges** with precise understanding of industry nuances
- **Avoid heavy AI integration** by reducing the need for complex customization
- **Deliver personalized experiences** through deep knowledge of customer needs

Enterprise-grade security at every step

According to [Gartner](#), an estimated 50% of cloud compute resources will be for AI workloads by 2029. That's a 40% increase from today. This rapid adoption and increasing dependence on data can cause security concerns for an organization.

Enterprise-grade security and resilience are foundational in Infor ERP Cloud Solutions, allowing you to have:

Built-in Security

Keep sensitive data secure and protected while it powers your AI investments

Governed AI

Scale AI solutions responsibly and confidently by managing their policies and controls

Industry Compliance

Comply with industry-specific regulations no matter the complexity

Why choose Infor

At a time where every organization is racing to implement AI, Infor helps you set off on the right foot through Infor Industry Cloud Platform.

Our multi-tenant open platform brings industry-specific capabilities and connects your systems to unify your data. Infor Industry Cloud Platform provides the foundation for Infor Velocity Suite, an all-inclusive AI package that pairs with Infor ERP Cloud solutions. With Infor Velocity Suite, your business becomes an agentic enterprise, where AI agents work alongside your team from day one, helping you realize value, quickly.

Find out more about how Infor enables you to build the data-driven foundation your AI needs.
