

# Top 3 healthcare worker challenges in the next 2 years

Create connections between caregivers, patients, and payers to overcome modern data challenges

## 3 challenges driving the future of the healthcare workforce

100 execs at provider organizations responded to a Health Leaders Buzz Survey with their top challenges:

**Key take aways** With more disruption ahead, leaders must find new ways to create meaningful connections between their people, technology, and overall vision. Here's how.

### CHALLENGE ONE

## Retain a high-quality workforce

In the last 2 years healthcare organizations have experienced high turnover, citing these challenges as critical to overcome:

**Key take aways** Empower tomorrow's leaders  
Ambient tech that eliminates dual data entry and ensures high-quality information helps healthcare address burnout and build a resilient workforce.

### CHALLENGE TWO

## Improve financial viability

With more uncertainty around elective surgery volumes and the future of value-based reimbursement, the top priorities for financial healthcare leaders are:

**Key take aways** Take action with digital transformation  
To meet these technology concerns and build new care models, partnering on digital transformations are helping healthcare orgs innovate.

### CHALLENGE THREE

## Embrace customer-centric care

Meet patients wherever they are. Top tech tools include:

## Advance your strategies with interoperability and workforce management

Interoperability, data sharing, and workforce management breaks down the walls between doctors, hospitals, and payers. But security is still top of mind.

**Key take aways** Real-time data right now  
More powerful security, systems integration processes, and analytics strategies can secure data from tablets and biometric devices.

## Create meaningful connections

Healthcare systems with the right technology partnerships will be best positioned to:
