

Infor Nexus Map and Trace

Infor Nexus™ Map and Trace offers companies greater supply chain transparency by automating the process of mapping multi-tier supplier networks and tracing materials. In a time of rising consumer demand for responsibly manufactured goods and tighter regulations, Map and Trace empowers organizations to demonstrate their commitment to preventing forced labor and promoting sustainable practices.

By using Map and Trace, companies can navigate the complexities of global supply chains, mitigate risks, and build trust with customers and stakeholders. Map and Trace streamlines the processes of mapping supplier networks, tracing materials, and maintaining compliance. This allows businesses to focus on what truly matters—delivering high-quality, ethically sourced products to their customers.

Benefits

- Gain end-to-end visibility into multi-tier supplier networks
- Help ensure compliance with laws like United States UFLPA and the French AGEC
- Respond faster to customs detentions and product inquiries, preventing penalties and lost sales
- Support product claims around sustainable materials
- Leverage data and information to enhance brand reputation and build customer trust

Enable transparency

Infor Nexus Map and Trace empowers companies to achieve greater supply chain transparency. By digitally mapping multi-tier supplier networks and enabling real-time collaboration, businesses can proactively identify and mitigate risks associated with forced labor and unethical practices.

The solution's comprehensive traceability capabilities allow companies to efficiently gather and verify documentation from all supplier tiers, ensuring materials and products are sourced from compliant partners. This transparency not only helps businesses adhere to evolving regulations like the Uyghur Forced Labor Prevention Act (UFLPA), the German Supply Chain Due Diligence Act (LkSG), and the French Anti-Waste and Circular Economy Law (AGEC), but also supports product claims around sustainable materials.

When goods are flagged for suspected forced labor, Map and Trace enables companies to swiftly provide the necessary documentation to clear goods and avoid costly delays, penalties, or lost sales. By centralizing supply chain mapping and traceability in the cloud, businesses can respond to customs inquiries with agility, ensuring products reach their destination markets without disruption.

Infor Nexus Map and Trace components

Infor Nexus Map and Trace empowers companies to chart their multi-tier supplier networks and trace materials through two central components:

Supply Chain Mapping: Invite each tier to join the platform and provide details about their facilities and their suppliers. Infor Nexus automatically verifies if the supplier has already been onboarded to prevent duplicates. This also enables the suppliers to manage one organization across buyers on the platform. This process continues upstream until the entire supply chain is comprehensively mapped.

Supply Chain Tracing: The process of tracing begins by selecting the relevant transactions (orders or shipments) and specific products. Each supplier tier is tasked with uploading the required supporting documents and identifying their suppliers, continuing this process up the supply chain. The buyer monitors progress and verifies documents at each stage. Once all verifications are complete, the system generates a comprehensive package of tracing materials and the mapped supply chain.

Key features

- Simple supplier invite and onboarding processes to accelerate mapping
- A detailed map of all suppliers in your supply chain to help mitigate risk
- Automated tasking, workflow, and status monitoring to expedite the tracing process
- Single login for suppliers to work across multiple buyers for increased efficiency
- Single platform to manage global trade and traceability for improved adoption and performance
- Open API architecture for seamless integration with existing enterprise systems and data sources
- Secure, cloud-based platform for effortless scalability and accessibility

Infor Nexus Map and Trace streamlines the effort to achieve end-to-end transparency by digitizing and automating supply chain mapping and tracing processes. The platform promotes real-time collaboration among trading partners, ensuring that information is shared efficiently and securely. With Map and Trace, companies can proactively manage their supply chains, minimize risks, and help ensure compliance with evolving regulations.
