

Better systems, better care

Advancing healthcare with
AI-driven innovation

IT leaders today face mounting pressure to deliver secure, clinically connected, and resilient healthcare operations while managing risk, cost, and complexity. Legacy systems struggle to keep pace with rapid technological shifts, rising cybersecurity threats, and increasing demands for interoperability and timely insight. Advanced automation and AI have become essential for digital transformation. Without real-time visibility and IT agility, organizations risk falling behind in performance, security, and compliance.

The most complete cloud ERP built for healthcare

Infor CloudSuite™ Healthcare is a purpose-built cloud ERP that unifies financial, supply chain, HR, workforce, and clinical data so you can simplify IT operations, enhance security, and innovate faster. Unlike comparable vendors that require costly integrations and third-party bolt-on solutions, Infor delivers a complete, prescriptive, care-connected ERP with AI-driven innovation for healthcare built right in. Industry-specific process catalogs, delivered integrations, and compliance tools reduce implementation effort compared to traditional ERP, lowering risk, cost, and IT burden.

Built on AWS, Infor delivers industry-leading security, scalability, and uptime – so you know your most critical data and operations are protected and always available.

Infor CloudSuite is secure, prescriptive, and care-connected

1

Cybersecurity and data privacy

Protect sensitive data with automated updates, real-time threat detection, and audit-ready controls. Built on AWS, Infor benefits from billions in annual R&D investments to deliver enterprise-grade security and resilience.

2

Innovate faster with Industry AI

Infor helps healthcare organizations uncover insights to speed decision making, automate time-consuming manual processes, and increase productivity while maintaining data security and governance.

3

Mobile-first for frontline workers

Give caregivers & support staff secure access to HR, scheduling, finance, and supply chain data – reducing administrative burden and enabling faster, more informed decisions at the point of care.

4

Interoperability and healthcare-specific workflows

Powered by Infor Cloverleaf, Clinical Bridge syncs ERP and EHR data automatically. Pre-built, delivered integrations connect clinical systems, GPOs, and partners for seamless, care-connected operations.

5

A cost-effective path to cloud

Purpose-built healthcare ERP with industry process catalogs that speed deployment and reduce risk. Infor minimizes hidden costs like integrations and staffing, enabling smarter budgeting and strategic alignment.

“Mobile apps have been a big win”

Amazon is investing an estimated \$100 billion into Amazon Web Services and AI in 2025.

Consolidate systems with one purpose-built platform for healthcare

Real results with AI-driven innovation built for healthcare

With automated, connected data, artificial intelligence helps healthcare supply chains work faster and smarter. AI-powered workflows identify process slowdowns, take over repetitive work, and keep operations running smoothly - so your team spends less time on tedious tasks and more time improving support for clinicians and patients.

Pinpoint and diagnose bottlenecks

Identify process slowdowns and areas for improvement before they impact productivity.

Save time by automating routine tasks

Eliminate manual work and gain vital insights and efficiencies in the first month.

Make compliance & supply decisions faster

AI-powered insights reduce risk and help staff make smarter, faster decisions.

Confluence Health eliminated hours of manual work through automation of two critical supply chain processes with Infor Velocity Suite: vendor compliance checks against the Office of the Inspector General (OIG) exclusion list, and AP invoice automation. Their innovation journey has just begun – many more AI-powered healthcare processes can further enhance operational efficiency.

Stace Webley, financial systems support manager, said, “We expected it would take at least 6 months to see results, but within the first month we reallocated a full FTE and saw a noticeable increase in employee satisfaction. That quick turnaround is what we’re most proud of.”

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
