

CLOUD ASSESSMENT

Take the cloud readiness assessment

Your simplified, data-driven path to the cloud

System upgrades are usually seen as complex and intimidating, but with a bit of preparation your transition to the cloud may be simpler than you ever thought possible. Our free Cloud Readiness Assessment provides a detailed analysis of your system that helps you discover the benefits of cloud software for your company, then gives you a potential route for getting there.

The information from the assessment reveals a personalized snapshot of how you are using data, your current customizations, and the complexity of your solution footprint. That insight will help us recommend the best route for transitioning from your current on-premises or single-tenant cloud solution to the multi-tenant cloud. The secure, read-only assessment is performed outside of business hours so it doesn't interfere with your other daily tasks. We do not see or collect any personal information as part of the assessment.

Data's significance on your cloud journey

Process

STEP 1

Introduction to the program

Meeting to review the complete engagement process and assessment value

STEP 2

Readiness assessment

A data assessment conducted outside of business hours, typically taking a few days or weeks depending on the size of your organization and dataset

STEP 3

Workshop

A detailed review of the assessment results with input from your process owners and subject matter experts, typically taking two to five days

STEP 4

Executive summary of findings

Final presentation of assessment results complete with a data-driven cloud transition strategy

What you get

After analyzing your data assessment results, we will prepare a proposal for upgrading your solution to the cloud. During a post-assessment workshop, we will confirm the proposed solution and discuss the opportunities that cloud deployment will bring to your organization. We will discuss the total cost of ownership, identify a major outcome that you could achieve, and discuss other potential process improvements. Following that, a statement of work is created which includes the timeline, integration, phasing, risk containment, and a confirmation of the proposal.

True collaboration and partnership

Now is the time to move to the multi-tenant cloud, and it's simpler than ever. If your organization is still operating on-premises applications, you could be hampering your ability to stay current with market and industry trends. You could also be limiting your organization's ability to evolve business models and pursue new opportunities.

Take the next step and begin your assessment today. It's our goal to help simplify your transition to the cloud.

“Expanding our relationship with Infor was an easy choice, as we strive to provide our teams with innovative, modern tools to make day-to-day tasks more efficient. We will retire numerous mission-critical systems into a single, cloud-based offering from Infor that will drive the digital transformation critical to our business.”

MIKE RODGERS

Senior Vice President, Digital and Technology Solutions, Pilot Flying J
