

CASE STUDY

Physik Instrumente positions itself for the future with Infor CloudSuite Industrial Enterprise

About the company

Founded in 1970, Physik Instrumente (PI) is a high-tech manufacturer based in Karlsruhe, Germany that's grown to become one of the world leaders in piezo technology. PI is privately owned with 1,300+ employees worldwide. As a flexible, vertically integrated organization, the company can fulfill virtually any request in the field of innovative precision positioning technology for industries such as life sciences, aerospace and defense, and semiconductors. PI has earned its reputation as a reliable, highly qualified, and innovative partner for its customers.

Requirements

- Partner with a solution provider that understands PI's unique business needs.
- Implement an agile, scalable, globally available, cloud-based ERP solution with industry-specific functionality and best practices.
- Eliminate the need to regularly apply patches and updates and oversee security management of on-premises servers.

Benefits

- Collaborated closely with Infor® to implement a cloud-based ERP solution that met PI's current vision, and will provide the agility and scalability to innovate and grow as PI evolves.
- Empowered PI's specialized consultants with instantaneous access to all pertinent information and best practices at customer sites, worldwide.
- Freed up internal IT resources to focus more on core business goals, instead of maintaining on-premises systems.
