

Certification Exam Guide

Infor Certified Landmark Developer v10

Exam #: LAW-LD10-100

Certification Program

Target Audience

The exam targets the skills and abilities required by a Landmark v10 Developer with relevant object orientated programming experience to successfully analyze client's business requirements and design and implement business solutions to meet those requirements.

Exam Details

- Exam number: LAW-LD10-100
- Onsite or Online, proctored
- 70 questions
- 90 minute time limit

Schedule and Register

Below are the steps to schedule and register for an onsite or online proctored exam.

Onsite

Prior to registering for an exam, please follow the steps below to register for your preferred exam date/time:

1. If required, create a new account by clicking [here](#).
2. If you already have an account, login to [Webassessor](#).
3. Click Register for an Exam.
4. Find the exam you wish to attempt.
5. Click Select next to the Onsite Proctored option.
6. Search for a test center or choose one of the closest test centers listed.
7. Select your preferred date and time to attempt the exam. (Test centers set their own testing schedules.)
8. Read and accept the Terms and Conditions and then click Select.
9. If you have a Voucher/Coupon code, enter the code and click Apply.
10. If the exam details are correct, click Checkout.
11. If using a credit card, choose your payment type and click Submit.
12. After confirming payment, click Done.
13. You will receive a confirmation email with your Test Taker Authorization Code and additional onsite details.

Please Note:

- Ensure you have your Test Authorization Code with you when you arrive at the test center. You cannot attempt your exam without the Test Authorization Code, and no refund will be provided.
- Please arrive at the test center at least 15 minutes prior to your scheduled exam.
- Parking and other test center specific instructions are included in your confirmation email.

Online

Prior to registering for an exam, please follow the steps below at least 5 days prior to you preferred exam date/time:

1. Test your Internet [connection](#). Run the test twice: once with the default server and then to a server in Arizona (e.g. Phoenix, AZ; Tempe AZ, Tucson, AZ; etc.) Results to an Arizona server must meet these minimum requirements:
 - o Ping times must be less than 200ms
 - o Jitter must be less than 50ms
 - o Download and upload must be greater than 1Mbps
2. Ensure your computer meets other requirements outlined in this [Guide](#). Some of the requirements are:
 - o A webcam is required - built in webcams ARE permitted
 - o A microphone is required - headsets are NOT permitted
 - o Sentinel Secure software must be installed (MS Windows and MAC supported)
3. If you encounter any problems, contact Kryterion Support:
 - o Voice: 866-227-7116 (U.S.) or +001-602-714-8235 (International)
 - o Live Chat: www.kryteriononline.com/Support, then click on "LIVE HELP"
 - o Email: OLPsupport@KryterionOnline.com
4. If required, create a new account by clicking [here](#).
5. If you already have an account, login to [Webassessor](#).
6. Click Register for an Exam.
7. Find the exam you wish to attempt.
8. Click Select next to the Online Proctored option.
9. Select your preferred date and time to attempt the exam and click Select.
10. Read and accept the Terms and Conditions and then click Select.
11. If you have a Voucher/Coupon code, enter the code and click Apply.
12. If the exam details are correct, click Checkout.
13. If using a credit card, choose your payment type and click Submit.
14. After confirming payment, click Done.
15. You will receive a confirmation email.

Exam Topic Area Summary

The following summarizes the percentage of each topic area included on the exam:

- Configurations - 42%
- Administering Landmark Security - 29%
- Administering Configurations - 16%
- Troubleshooting Landmark Security - 6%
- Personalization - 4%
- Administering Users - 3%

Related Training and Documentation

Although not required, the following training courses and documentation cover content included in this exam:

- Training courses found on Campus:
 - Lawson: Configuration Console Introduction
 - Lawson: Administering Configuration Console

Exam Objectives by Topic Area and Resource

This certification exam includes the following exam objectives by topic and course.

Resource and related exam objective(s)	Topic Area and Percentage					
	Configurations	Administering Landmark Security	Administering Configurations	Troubleshooting Landmark Security	Personalization	Administering Users
	42%	29%	16%	6%	4%	3%
Lawson: Configuration Console Introduction						
Define basic Configuration Console terminology.	X					
Define the benefits of Configuration Console.	X					
Define the function of Configuration Console.	X					
Define the purpose of Configuration Console.	X					
Describe the components that can be configured by the application administrator using Configuration Console.	X					
Describe the components that can be personalized by the end user using Configuration Console.	X					
Describe Security configurations that can be made by the Security administrator using Configuration Console.		X				
Lawson: Administering Configuration Console						
Explain how to use cdexport for exporting individual configurations in Configuration Console.			X			
Assess whether a requested configuration is an application configuration or a security configuration.			X			
Modify a menu.			X			
Create a user field and determine the field type to be defined.			X			

Resource and related exam objective(s)	Topic Area and Percentage					
	Configurations	Administering Landmark Security	Administering Configurations	Troubleshooting Landmark Security	Personalization	Administering Users
	42%	29%	16%	6%	4%	3%
Modify a user action.			X			
Troubleshoot Issues related to application configurations.			X			
Describe the Landmark security structure.		X				
Describe ways to assign Landmark security classes in Configuration Console.		X				
List the benefits of Configuration Console security.		X				
List the purpose of Configuration Console security.		X				
Outline how Landmark security classes are organized in Configuration Console.		X				
Identify ways to create a custom Landmark role by combining roles in Configuration Console.		X				
Identify ways to create a custom Landmark role by combining roles in Configuration Console.		X				
Identify ways to create a custom Landmark role using Configuration Console.		X				
Describe Landmark securable objects in Configuration Console.		X				
Outline steps to create a custom Landmark security class using security templates in Configuration Console.		X				
Explain the differences between modifications, configurations, and personalizations.	X					
Define business classes in Configuration Console.	X					
List the components that you can configure using Configuration Console.	X					
Define the purpose of configuring user-defined application relations using Configuration Console.	X					
Describe the purpose of changing a business class form action configuration using Configuration Console.	X					
Identify the steps to configure a list using Configuration Console.	X					
Outline the process to create a field on a form using Configuration Console.	X					
Identify ways to configure a new action extension for Landmark applications.	X					
Describe how to configure Multipurpose Internet Mail Extensions (MIME) types using Configuration Console.	X					
Outline how to create a Web services configuration using Configuration Console.	X					
Identify ways to create a personalization using the Infor Landmark Rich Client Dashboard.					X	
Define ways to troubleshoot issues with copying security classes in Configuration Console.				X		
Define ways to configure an actor in Configuration Console.						X
Define ways to troubleshoot issues with creating security classes in Configuration Console.				X		

Questions and Help

Sample Questions

The sample questions below provide examples of the types of questions included on the certification exams delivered through the Webassessor testing platform. The correct answers are provided for reference purposes only in the following Key to Sample Questions section. **Note:** The Webassessor platform randomizes all certification question items and answer options during the exam.

1. Which one of the following is a tool within the Infor Rich Client that enables administrators to make global changes to Infor applications built on the Landmark platform?
 - A. Spreadsheet Designer
 - B. Configuration Console
 - C. Infor Landmark
 - D. Microsoft® Add-ins
2. Which one of the following describes the Configuration Console?
 - A. It is a Landmark Rich Client tool
 - B. It is a command line tool
 - C. It is an HTML web tool
 - D. It is an Infor Process Automation tool
3. Which one of the following options include the four configuration options for Configuration Console?
 - A. Process Definitions, Security, Mime Types, Web Services
 - B. Application, Security, Web Services, Process Flow - Service Definition
 - C. Application, Security, Mime Types, Web Services
 - D. Process Flow, Process Definitions, Security, Web Services
4. Which one of the following involves changing source codes and requires a build process?
 - A. Personalization
 - B. Modification
 - C. Configuration
 - D. Distribution
5. Which one of the following contains the basic definitions for what data is in an application, how it is organized, and how it is processed?
 - A. Multipurpose Internet Mail Extensions (MIME) types
 - B. Business classes
 - C. Data areas
 - D. Action requests
6. Which one of the following components can be configured on a page using the Configuration Console?
 - A. Menus
 - B. Panel layout
 - C. Data area
 - D. Action request

7. Which one of the following is an Infor recommendation when creating a new field to relate to another business class?
- A. Reference user fields from the same business class
 - B. Reference user fields from the related business class
 - C. Reference user fields from both the same and related business class
 - D. Don't reference any other user fields
8. Which one of the following fields would you add to a business class if you wanted an Anniversary Date field as a display only field on a form?
- A. Snapshot field
 - B. Derived field
 - C. User field
 - D. Compute field
9. Which one of the following suffixes is used to indicate the standard Landmark security class templates?
- A. ___TS
 - B. ___ST
 - C. ___PC
 - D. ___LS
10. Which one of the following is part of the standard delivered security templates?
- A. Pre-defined usernames and protocols
 - B. Pre-defined actors and roles
 - C. Pre-defined security classes and roles
 - D. Pre-defined security rules and roles
11. Which one of the following describes the Personalization modification type in the Configuration Console?
- A. Changes end users can make to enhance their own experience
 - B. Global changes an administrator can make
 - C. Clearing all caches
 - D. No modifications can be made
12. Which one of the following is a way that a security administrator can customize a role?
- A. Copy and rename an Infor standard template, and then add or delete assigned security classes
 - B. Delete a delivered Infor standard template
 - C. Roles are preconfigured and cannot be customized
 - D. Modify the delivered security classes and then assign to the role
13. Which two of the following can an organization's security administrator configure? Choose 2 answers.
- A. The relationship between actors and roles
 - B. Creation of new web services
 - C. Modification of standard template security classes
 - D. The relationship between roles and data translation

14. Which one of the following security class types has the ability to approve and move transactional data through a workflow and the next step in the process?
- A. Maintain transactional data
 - B. View transactional data
 - C. View setup components
 - D. Maintain setup components
15. Which one of the following tools is used to make a form's behavior conditional?
- A. Infor Rich Client
 - B. Infor Ming.le™
 - C. Condition Builder
 - D. Spreadsheet Designer
16. Which one of the following would you use if you wanted to route an action on a form to several users for approval before it is updated in the system?
- A. Calculation
 - B. Action Request
 - C. Tolerance
 - D. Multipurpose Internet Mail Extensions (MIME)
17. Which one of the following describes a user field?
- A. A field created through a statement using values from existing fields
 - B. A field containing conditions that control the behavior of other user interface components
 - C. A field that capture values from another field to create a field of the same type and size
 - D. A field created to capture and save user data
18. Which two of the following options are methods to test a configuration change prior to committing the change to all users in an organization? Choose 2 answers.
- A. Create the change in My Personalizations console to try out the change
 - B. Create the change in the Configuration Console for the system administrator to try out the change
 - C. Create configuration changes in a test environment to try out the changes
 - D. Create changes in a production environment to try out the changes
19. Which one of the following menus in Configuration Security is used to configure actors?
- A. Actions
 - B. Option
 - C. Related
 - D. Application
20. Which one of the following appears in the My Personalization Console when a personalization exits??
- A. A blue checkmark next to the object
 - B. A green checkmark next to the object
 - C. A blue arrow next to the object
 - D. A green arrow next to the object

Key to Sample Questions

The correct answers for the Sample Questions are provided here for reference purposes only. **Note:** The Webassessor platform does not provide correct answers/feedback during the exam.

1. Which one of the following is a tool within the Infor Rich Client that enables administrators to make global changes to Infor applications built on the Landmark platform?
 - A. Spreadsheet Designer
 - B. Configuration Console
 - C. Infor Landmark
 - D. Microsoft® Add-ins
2. Which one of the following describes the Configuration Console?
 - A. It is a Landmark Rich Client tool
 - B. It is a command line tool
 - C. It is an HTML web tool
 - D. It is an Infor Process Automation tool
3. Which one of the following options include the four configuration options for Configuration Console?
 - A. Process Definitions, Security, Mime Types, Web Services
 - B. Application, Security, Web Services, Process Flow - Service Definition
 - C. Application, Security, Mime Types, Web Services
 - D. Process Flow, Process Definitions, Security, Web Services
4. Which one of the following involves changing source codes and requires a build process?
 - A. Personalization
 - B. Modification
 - C. Configuration
 - D. Distribution
5. Which one of the following contains the basic definitions for what data is in an application, how it is organized, and how it is processed?
 - A. Multipurpose Internet Mail Extensions (MIME) types
 - B. Business classes
 - C. Data areas
 - D. Action requests
6. Which one of the following components can be configured on a page using the Configuration Console?
 - A. Menus
 - B. Panel layout
 - C. Data area
 - D. Action request

7. Which one of the following is an Infor recommendation when creating a new field to relate to another business class?
- A. Reference user fields from the same business class
 - B. Reference user fields from the related business class
 - C. Reference user fields from both the same and related business class
 - D. Don't reference any other user fields
8. Which one of the following fields would you add to a business class if you wanted an Anniversary Date field as a display only field on a form?
- A. Snapshot field
 - B. Derived field
 - C. User field
 - D. Compute field
9. Which one of the following suffixes is used to indicate the standard Landmark security class templates?
- A. ___TS
 - B. ___ST
 - C. ___PC
 - D. ___LS
10. Which one of the following is part of the standard delivered security templates?
- A. Pre-defined usernames and protocols
 - B. Pre-defined actors and roles
 - C. Pre-defined security classes and roles
 - D. Pre-defined security rules and roles
11. Which one of the following describes the Personalization modification type in the Configuration Console?
- A. Changes end users can make to enhance their own experience
 - B. Global changes an administrator can make
 - C. Clearing all caches
 - D. No modifications can be made
12. Which one of the following is a way that a security administrator can customize a role?
- A. Copy and rename an Infor standard template, and then add or delete assigned security classes
 - B. Delete a delivered Infor standard template
 - C. Roles are preconfigured and cannot be customized
 - D. Modify the delivered security classes and then assign to the role
13. Which two of the following can an organization's security administrator configure? Choose 2 answers.
- A. The relationship between actors and roles
 - B. Creation of new web services
 - C. Modification of standard template security classes
 - D. The relationship between roles and data translation

14. Which one of the following security class types has the ability to approve and move transactional data through a workflow and the next step in the process?
- A. Maintain transactional data
 - B. View transactional data
 - C. View setup components
 - D. Maintain setup components
15. Which one of the following tools is used to make a form's behavior conditional?
- A. Infor Rich Client
 - B. Infor Ming.le™
 - C. Condition Builder
 - D. Spreadsheet Designer
16. Which one of the following would you use if you wanted to route an action on a form to several users for approval before it is updated in the system?
- A. Calculation
 - B. Action Request
 - C. Tolerance
 - D. Multipurpose Internet Mail Extensions (MIME)
17. Which one of the following describes a user field?
- A. A field created through a statement using values from existing fields
 - B. A field containing conditions that control the behavior of other user interface components
 - C. A field that capture values from another field to create a field of the same type and size
 - D. A field created to capture and save user data
18. Which two of the following options are methods to test a configuration change prior to committing the change to all users in an organization? Choose 2 answers.
- A. Create the change in My Personalizations console to try out the change
 - B. Create the change in the Configuration Console for the system administrator to try out the change
 - C. Create configuration changes in a test environment to try out the changes
 - D. Create changes in a production environment to try out the changes
19. Which one of the following menus in Configuration Security is used to configure actors?
- A. Actions
 - B. Option
 - C. Related
 - D. Application
20. Which one of the following appears in the My Personalization Console when a personalization exits??
- A. A blue checkmark next to the object
 - B. A green checkmark next to the object
 - C. A blue arrow next to the object
 - D. A green arrow next to the object
