

Transforming life science interoperability with Infor's Cloverleaf FHIR solutions

Empower data-driven innovation and streamline operations with Infor's advanced FHIR integration.

The data integration revolution in life science

Seamless data unity:

Integrate internal and external data for comprehensive insights from clinical trial recruitment to FDA submission.

AI and ML empowerment:

Leverage advanced AI and ML technology to analyze diverse data sources, create personalized treatment plans, and monitor clinical trial efficacy in real-time.

The Infor advantage: Achieve unparalleled interoperability with Infor's data integration platform

- **Infor Cloverleaf® Integration Suite & Infor FHIR On-Ramp (IFOR):** Bridge diverse research data systems and transform legacy formats into FHIR R4, ensuring interoperability and data readiness for advanced life science applications.
- **Data Lake:** Experience the zenith of data storage, transformation, and analysis, facilitated by a HIPAA-compliant environment that fosters next-gen innovation.

Overcoming integration challenges

Comprehensive visibility:

Gain unparalleled insights into the life sciences landscape through aggregated data analysis, paving the way for accessible and targeted real-world evidence.

Strategic partnerships for innovation:

In collaboration with major cloud vendors, Infor delivers end-to-end data integration, modernization solutions, and built-in AI and ML tools to advance actionable alerts and insights.

Achieving interoperability and enhancing patient experience

Embracing interoperability standards:

Adopt standards like HL7 FHIR to streamline data exchange and integration across platforms in life sciences. Enhance collaboration between research teams, laboratories, and regulatory bodies while ensuring compliance and improving user experience.

Data-driven life science outcomes:

Leverage Infor's powerful data capabilities to advance interoperability, improve research accuracy, and comply with emerging industry standards and regulatory requirements without depleting valuable resources.

About Infor

Infor is a global leader in business cloud software products for companies in industry specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.

About Infor Cloverleaf

Infor Cloverleaf has a rich history of revolutionizing clinical data integration, trusted by over one-third of U.S. healthcare organizations and over 5,000 customers worldwide. Its legacy of reliability and scalability is demonstrated through the unmatched performance of exchanging over 1.5 billion secure transactions daily. Known for its seamless execution and sophisticated interoperability, Infor Cloverleaf ensures critical data availability across diverse systems. This robust integration platform empowers organizations to adapt and grow, meeting evolving demands with precision and confidence.
