

The clear path from AI ambition to real business outcomes

Why most AI adoption stalls, and what separates the companies that break through

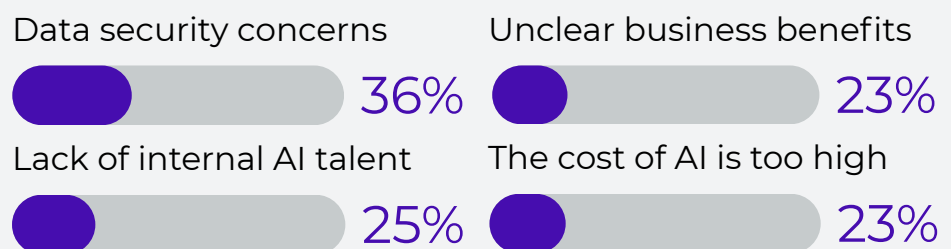

Most companies are stuck. Here's why.

AI's importance is rarely in question. Knowing where to start is the harder problem. In a survey of 1,000 decision-makers, Infor found a consistent pattern: the gap isn't ambition, it's a starting point.

Why businesses say AI stalls

The common thread: generic AI doesn't fit.

Most AI tools are built for every industry at once, which means they're built for none of them specifically. Companies stall not because they lack ambition, but because the AI they've tried doesn't understand how their industry actually operates, its compliance requirements, its workflows, and its data.

The companies that break through start differently: with industry context and a trusted data foundation first, then infuse industry-specific AI into their processes.

Target the highest-value AI opportunities

Start with a quick self-assessment, then go deeper with an Infor expert to see where AI fits in your business.

1) Infor's AI Opportunity Assessment

Answer a few quick questions about your industry, your role, and what's slowing your team down. In two minutes, you'll see how AI connects to your specific priorities: a readiness score, a preview of where the value is highest, and a clear starting point.

- See exactly which AI use cases move the needle
- Get matched to opportunities built for your industry
- Walk away with a readiness score and a clear starting point

Personalized AI Roadmap

2) Guided Value Discovery with an Infor Expert

A guided session that turns your priorities into a full, phased roadmap, built on Infor Velocity Suite, with live prototypes built around your actual challenges.

- Turn your assessment results into a real, phased roadmap
- See live AI prototypes built around your actual challenges
- Get a plan sequenced from quick wins to long-term outcomes

Built for your industry

Every company starts from a different point, and the right AI reflects that. Infor Velocity Suite gives you the flexibility to start where the value is highest, adopt at the pace your business demands, and scale with predictable cost and built-in governance with AI made for your industry.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
