Auto industry functionality powered in the cloud

Supporting the automotive industry of today and tomorrow

Combining the Infor® cloud platform and infrastructure services from Amazon Web Services® (AWS®), Infor CloudSuite Automotive delivers a core ERP with last mile functionality without extensive customizations or integrations, an unmatched user experience, automatic upgrades, and the latest AI, ML, process intelligence, and automation technologies.

With CloudSuite Automotive OEMs, Specialty Vehicle manufacturers and Suppliers can continuously adapt to changes in the industry, whilst improving business performance and enhancing prospects of long-term success.

Embrace change with CloudSuite Automotive

C.A.S.E. (Connected, Autonomous, Software-Defined, and Electrified) megatrends, increasingly demanding customers, exponential product configurability and complexity, and growing regulatory and sustainability requirements are fundamentally changing the industry. OEMs, Tier Suppliers and Specialty Vehicle companies also need to adapt fast in response to geopolitical and market uncertainty, mounting financial challenges, and the relentless pressure for constant innovation.

More than ever, businesses need agility, efficiency, supply chain visibility, innovation and speed-to-market to anticipate and respond to this rapidly-changing landscape.

Although disruptive, these factors also provide vast opportunities for OEMs, Suppliers and Specialty Vehicle companies who are ready to embrace the challenge, while also:

Modernizing operations and implementing new production models, such as unboxed manufacturing/giga casting, with a standardized platform, to improve productivity and agility

Connecting people, processes, and data in a holistic, end-to-end view across the value chain

Reducing operational costs, improving business resilience and financial performance

Improving the in-vehicle user experience

To help you tackle these and other challenges head-on, Infor delivers Infor CloudSuite Automotive—combining deep industry-specific functionality with the latest technologies.

Top 6 reasons to choose Infor CloudSuite Automotive

Cloud design drives your organization's business agility and scalability

The service provides a role-based user experience enhanced with embedded GenAI, data aggregation, workflow integration, hyperscaling, automatic upgrades, and a data lake.

Agility

Enhance agility and adopt best practices to improve business resilience and performance

Innovation

Built-in automotive industry expertise to innovate faster and outpace your competition

Velocity

Quickly scale to support new business models

Time to value

Pre-configured industry processes speed time to value and reduce total cost of ownership

Customer satisfaction

Deliver a differentiated customer experience

Compliance

Simplify security and compliance across the enterprise with automatic updates

“ Infor's industry vertical approach was the easiest path and solution to get what we needed from our core ERP system. It is a cost-effective solution. Infor brought a unified approach, global perspective, and a partnering perspective [..] ”

David Martin

CFO, Titan International

Maximize your competitive advantage and differentiation with solutions built for your industry

OEMs

CloudSuite Automotive improves supply chain collaboration, plant(s) capacity and utilization, and enables the assembly of vehicles with different option configurations on the same line, so you can optimize volume, mix, and profitability.

Specialty Vehicle manufacturers

CloudSuite Automotive enhances your capacity to build and sell unique, individually customized vehicles, assembled on the same line, while improving profitability for each unit.

Tier Suppliers

CloudSuite Automotive supports multiple manufacturing modes, synchronizes with OEM demand schedules, provides complete financial visibility and helps you continuously optimize operations and profitability.

Transform your business operations with Infor's automotive ERP cloud solution, pre-configured for your industry

Run multiple divisions and business models in one place to get financial visibility across the enterprise, instantly

Optimize forecasting and resources with multi-site planning for just-in-time/just-in-sequence, and assembly line coordination across multiple sites

Enable the usage of multiple Order to Cash procedures such as build-to-order, make-to-order, configure-to-order; support assembly sequence control and multiple manufacturing modes, including repetitive, job shop and project-based

Operate compliantly around the globe with built-in localization for rapid deployment in 68 countries and 26 languages, supporting region-specific compliance requirements

Enhance user experience, productivity and decision-making with automotive specific KPIs, persona-driven workspaces and embedded GenAI

Enhance and extend your CloudSuite Automotive capability with Infor market-leading applications

Infor's CloudSuite Automotive ERP comes with pre-built integrations to a complete ecosystem of applications, powered by Infor OS Platform, to give your organization that critical competitive edge.

With **Infor Industry Applications** specific for micro-vertical workflows

 <p>EPM Enterprise Performance Management</p>	 <p>HCM & WFM Human Capital Management, Workforce Management</p>	 <p>SCM WMS, Transportation Management, Supply Chain Planning, Nexus</p>	 <p>Analytics Enterprise Analytics and BI</p>
 <p>MES Manufacturing Execution System</p>	 <p>GRC Governance, Risk & Compliance</p>	 <p>PLM Product Lifecycle Management</p>	 <p>CPQ Configure, Price, Quote</p>

1. Bring products to market faster

Speed up the product design and development process and accelerate New Product Introduction (NPI) with integrated **Product Lifecycle Management (PLM)** with automotive-specific capabilities such as APQP (Advanced Product Quality Planning) and MMOG (Materials Management Operations Guideline); eliminate disconnects between product development, engineering, manufacturing and financials via seamless information flow from design through production.

2. Enable complex, customized vehicle configuration and pricing

Increase revenue with an intuitive configure/price/quote system, that improves customer experience and sales efficiency from quote to fulfillment with Infor's market-leading **CPQ**.

3. Streamline global multi-enterprise trade

Orchestrate and manage complex supply chain processes, with integrated **EDI-driven customer and supplier collaboration** and complete supply chain network visibility.

4. Automate manufacturing processes

Provide the next level of factory and warehouse automation with advanced, IoT-enabled **Manufacturing Execution Systems (MES)** and **Warehouse Management Systems (WMS)**, and leverage the latest technology to streamline production processes, improve OEE and quality, inventory accuracy, and workforce efficiency.

5. Drive the business with data

Deliver insight, utilizing data from multiple sources within and outside your organization; easily integrate with third-party applications. Create and edit metrics, and provide personalized metrics for users who need to produce their own KPIs.

“ Moving our data to the Infor Data Lake helped reduce data acquisition and storage complexity, making it easier to generate ROI in our content investment and IP development. ”

William G. Miller II
 President and CEO
 Miller Industries

Stay ahead with a connected platform for innovation and intelligence

CloudSuite Automotive runs on Infor OS Platform.

Infor OS Platform provides comprehensive services to help you solve the unique challenges facing your business, so you can be more productive, agile, and stay ahead.

Powered by Infor OS Platform with unified AI-driven intelligence and embedded automations

Industry AI

Predictive, prescriptive, and generative AI

Value+ Solutions

Pre-built automations, insights, and advanced workspaces

Integration

Infor and third-party application integrations and centralized API management

App Development

Low-code to full code custom application development

Data & Insights

Centralized data fabric with reporting, planning, and intelligence

Transform historically complex AI technologies (natural language processing, intelligent automation, and machine learning) into valuable tools and attainable enterprise goals, with Infor GenAI embedded in your CloudSuite and Infor Augmented Intelligence Service.

Adopt pre-built solutions to automate processes, increase productivity, ensure compliance and improve data insights with Infor Value+ solutions.

Integrate Infor and third-party enterprise products in the cloud, on-premises, or in hybrid deployments with Infor Backend as a Service (BaaS) capabilities and API gateway for seamless operations and visibility.

Provide data acquisition technologies and a unified repository for capturing enterprise data. Infor's data lake ensures data fidelity, governance, security, and access.

Integrate governance, risk, and compliance (GRC) software to help monitor regulatory and statutory standards and proactively update critical applications.

Easily create the right experience with minimal coding with Infor's developer tools—whether it's an intuitive consumer-grade web interface, a high-productivity form, or a business process to replace customizations.

▲ 99%

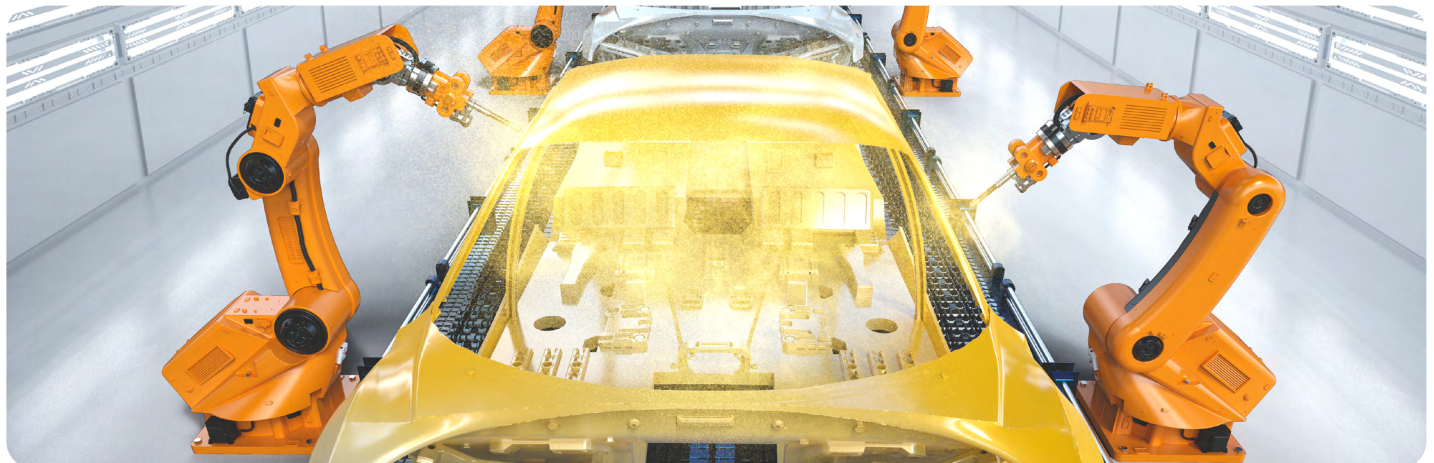

faster detection and diagnosis of failure at Automotive component supplier

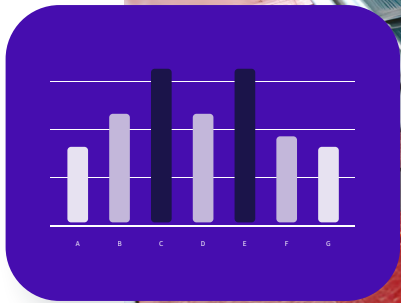

▼ 3000+

estimated labor hours saved annually at OEM

▼ 75%

reduction in sales order processing time at Global Tier Supplier

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
