

It's time to retire your AS/400 and transform your operations with a modern SaaS warehouse management solution

Why migrate?

1. Unsupported systems are vulnerable, increasing security risks.
2. Older systems can't leverage modern automation and artificial intelligence (AI) for improved productivity.

The challenge

Customization overload

- Your system has extensive customizations that can't be easily transferred
- No "easy button" to migrate from legacy systems with heavy customizations

Labor issues

- Difficulty finding skilled labor to work on outdated systems

The solution

Advance to a modern SaaS platform

- Adapt to constant innovation by upgrading your technology
- Leverage new functionalities that a modern WMS platform offers, like **Infor® Warehouse Management System (WMS)**
- Customize your solution with our native low-code/no-code Extensibility Toolkit, covering WebUI, WebRF, REST APIs, labels, and business logic

Why now?

Risk mitigation

Avoid exposing your organization to security risks with unsupported software

Innovation access

Enable adoption of new technologies and productivity improvements

Simplicity

Much of your existing functionality may already be available in modern WMS solutions

Why choose Infor WMS?

30+ years in supply chain

Trusted expertise with deep industry experience

1,300 global customers and 5,000 installations

Proven reliability and implementation success worldwide

Powerful extensibility

Tailor and extend the base solution to meet your needs

Out-of-the-box, industry-specific functionality

Configuration-based solutions for immediate impact

True multi-tenant cloud (SaaS)

Scalable and secure cloud solutions

Gartner® Magic Quadrant™ WMS Leader for 6 years

Recognized industry leader

Take the next step

We're here to help you transition from a heavily customized system to a modern, scalable solution that still meets your unique needs while future-proofing your warehouse operations.
