

Infor Supply Chain Management

From uncertainty to action in an unpredictable world

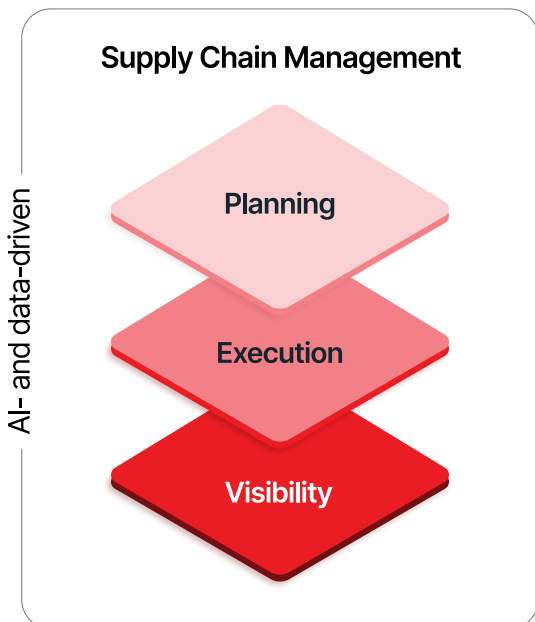

Your supply chain was built for a world that no longer exists. Geopolitical tensions, shifting regulations, and tariff changes are no longer occasional disruptions—they are recurring realities. Systems implemented just a few years ago were built for predictable outcomes and steady-state operations. Today, these systems struggle to model risk, prioritize trade-offs, or react in real time when multiple scenarios unfold simultaneously.

While artificial intelligence (AI) will help overcome these issues, you don't have an easy way to get there. AI is evolving so fast that only multi-tenant cloud solutions can continuously deliver the latest capabilities, keeping your supply chain competitive not just today, but five years from now.

For supply chain leaders, the result is hesitation. Investments are deferred. Planning becomes conservative, and organizations miss opportunities to pivot proactively. Leaders face a clear choice—accept disruption or create a supply chain that uses technology to turn uncertainty and volatility into an advantage.

Predict, see, and pivot at scale with Infor

Infor™ Supply Chain Management provides modern **planning, execution, and visibility** built for continuous change in the multi-tenant cloud. It brings together AI and data to help you anticipate impact, choose the best course of action, and collaborate and respond at scale.

Intelligent optimization

Powered by the cloud to deliver **AI, agentic orchestration,** and **data-driven** insights for **real-time visibility** and automated processes you can actually execute.

End-to-end visibility and orchestration

From **plan to delivery,** a supply chain control tower with AI predictive insights that coordinates your entire network to improve on-time, in-full (OTIF) while managing costs.

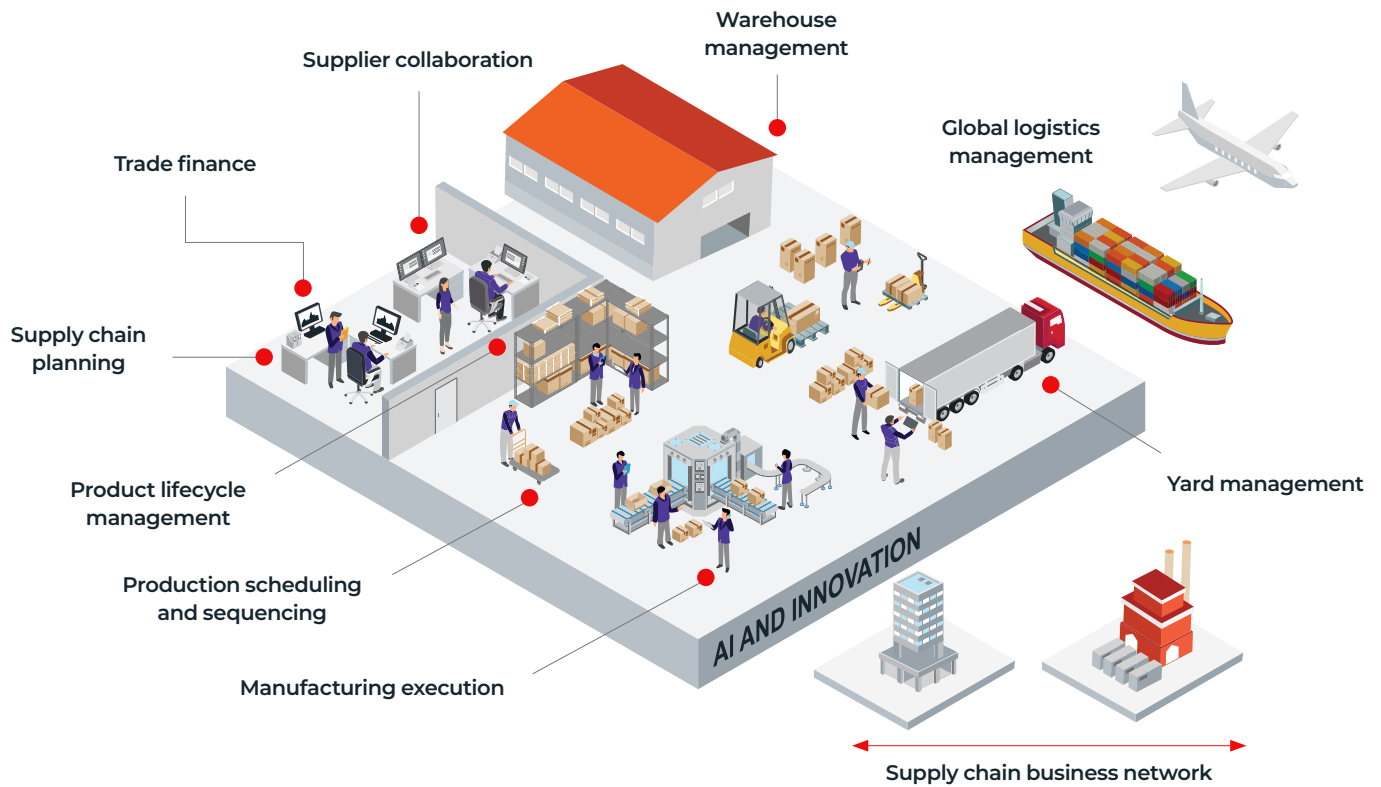

Built for your industry

The right products for your industry, with the right partnerships, services, and tools for a **proven path to value.**

Everything you need for a predictive and proactive supply chain

Infor Supply Chain Management is a composable portfolio of AI-driven multi-tenant cloud solutions that provide visibility and orchestration across your supply chain to help you run more efficiently and flexibly, increase OTIF performance, and improve profitability.

Explore the tools built for your supply chain

Infor Warehouse Management System

Transform operations with a tier-one system featuring 3D visualization, voice processing, and analytics. A Gartner® Magic Quadrant™ Leader for eight years running, Infor WMS supports the raw materials to finished goods journey across all levels of warehouse maturity.

Infor Nexus Supply Chain Business Network

Connect with a network of more than 94,000 brands, retailers, manufacturers, suppliers, logistics providers, and banks to seamlessly orchestrate end-to-end supply chain processes from order through delivery.

[Learn more](#)

Infor Supply Chain Planning

Respond faster to market changes with a portfolio of products that use advanced algorithms, AI, and analytics to optimize planning, forecasting, and production scheduling.

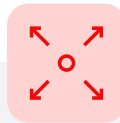

[Learn more](#)

Infor Yard Management System

Improve dock and yard flow with real-time visibility into trailers, appointments, and constraints—reducing dwell time, optimizing labor and equipment, and improving gate-to-gate execution.

[Learn more](#)

Infor Manufacturing Execution System

Gain real-time visibility and control over production processes while maintaining quality and optimizing workflows. Supports every level of operational maturity from raw input to finished output.

[Learn more](#)

Infor Product Lifecycle Management

Connect product strategy to supply chain outcomes by managing product data, specifications, changes, and collaboration across teams and suppliers. Improve time to market and compliance while enabling smarter sourcing decisions and more resilient, cost-aware product designs.

Outperform disruption with Infor Supply Chain Management

Here are the outcomes organizations consistently achieve across industries with Infor.

Improve profitability

Reduce transportation spend, expedite fees, service level agreement (SLA) penalties, and overtime labor while improving forecast accuracy to cut stockouts and recover lost sales. Smarter planning and execution protect margins and drive top-line growth.

Deliver OTIF

Real-time execution visibility and automated workflows reduce fulfillment failures, helping teams consistently meet delivery commitments and protect customer trust.

Build resilience

End-to-end visibility surfaces risks earlier and enables proactive pivots across sourcing, logistics, and production—shrinking the time from insight to action.

Optimize working capital

Improve inventory accuracy, reduce in-transit safety stock, and unlock expanded payment terms and supply chain financing across your network—freeing up capital tied up in inefficient buffers.

Stay future-ready

With Infor's multi-tenant cloud, the latest AI, agentic AI, and technology innovations are automatically and continuously delivered so you can adapt to whatever comes next.

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
