Stay ahead of CMS regulations with Infor Cloverleaf

The population health deadline is approaching, will your organization be ready?

Why Infor Cloverleaf?

Infor Cloverleaf ™ ensures your organization stays ahead of evolving Centers for Medicare & Medicaid Services (CMS) data regulations while equipping you to solve challenges you didn't see coming. With seamless FHIR®-based interoperability, advanced analytics, and automated workflows, Cloverleaf transforms fragmented data into **real-time insights**, empowering **proactive population health management**.

Stay compliant, stay agile, and lead with the innovative power of Infor Cloverleaf.

Infor Population Health Analytics for eCQM Reporting

Actionable insights, improved outcomes

Infor Cloverleaf empowers healthcare organizations to meet stringent CMS guidelines for Electronic Clinical Quality Measure (eCQM) requirements and optimize population health outcomes. Key features include:

- **Unified data integration:** Aggregate clinical data from diverse sources (HL7 v2, CCDA, CSV, etc.) and transform it into FHIR R4 for comprehensive analysis and reporting

- **Enhanced data quality:** Utilize natural language processing and data enrichment techniques to extract hidden semantics, ensuring high-quality data for accurate eCQM reporting

- **Real-time reporting:** Integrate clinical and operational data in near real-time to provide healthcare professionals with actionable insights and timely interventions

- **Compliance and transparency:** Meet CMS reporting standards by the 2026 deadline and be able to report
on the entire patient population, ensuring transparency and compliance with regulatory requirements

- **Longitudinal patient records:** Maintain a comprehensive, chronological view of patient data across various touchpoints, enhancing care coordination and treatment planning

- **Knowledge graphs and machine learning:** Unlock the potential of clinical data through knowledge graphs and graph machine learning, facilitating predictive analytics and risk stratification

- **Customizable dashboards:** Use intuitive dashboards to gain real-time insights into healthcare operations and extract data for on-depth analysis and strategic decision-making

Infor Cloverleaf's advanced analytics capabilities provide a holistic view of patient data, enabling proactive population health management

Partner with Infor and AWS

Infor Cloverleaf, in collaboration with AWS HealthLake, delivers **secure**, **scalable**, **HIPAA-compliant**, cloud-based solutions. Together, we offer:

- **Frictionless data storage and access:** Aggregate clinical data from diverse sources (HL7 v2, CCDA, CSV, etc.) and transform it into FHIR R4 for comprehensive analysis and reporting

- **Integrated FHIR ecosystem:** Connect legacy systems with emerging FHIR-based applications to ensure your organization stays at the forefront of healthcare innovation

- **Secure and scalable:** Cost-effective solution that grows with you

Actionable insights are the future of population health with Infor Cloverleaf

About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
