

Elsinore Valley MWD moves to the cloud for smoother payroll cycles

About the company

Elsinore Valley Municipal Water District has served California's Southwestern Riverside County since 1950. Its services include provisioning public water, water supply development and planning, wastewater treatment and disposal, and recycling for 160,000 people.

Business case

- Streamline and simplify time-consuming payroll tasks
- Eliminate ongoing hardware, database, and software upgrades
- Improve disaster recovery and business continuity preparedness

Business accomplishments

- Improved payroll processing time by 50% to 60% and eliminated 70% of payroll interfaces
- Automated payroll approvals for employee timecards, time off, and leave requests
- Implemented flexible work schedules, maintaining 100% FLSA compliance
- Moved Infor Global HR Payroll and Infor Financials to the same platform to enhance reconciliation
- Met COVID-19 remote work needs to avoid disruption in payroll processing
- Provided web browser or Infor Go app access to pay stubs, W4s, and taxes
- Accelerated approval time for HR processes with Infor Go

“ We’ve been able to access critical payroll data, anywhere, anytime, allowing our remote teams to work together, even though apart. Our teams can focus on automation, innovation, and core business—not technology—which is what we need right now.”
