

# Infor Planning One advanced planning for manufacturing- specific CloudSuites

Infor™ Planning One, powered by Kinaxis®, provides a low-risk, low-cost way for companies of any size to go from Excel to advanced planning in weeks. Realize the benefits of supply chain transparency and the ability to make critical decisions faster and more confidently. Based on the Kinaxis Planning One™ solution, this market-leading solution integrates Infor's industry-specific CloudSuites™—for automotive, industrial manufacturing, electricals and electronics, and aerospace and defense—with the advanced supply chain solutions from Kinaxis.

## Transformation challenges are everywhere

Increasingly complex and rapidly rising global supply chain disruptions, mixed with everyday volatility, means your business faces more pressure than ever before. It's imperative to break down silos, connect critical functions across your operations, and digitally transform your supply chain to compete. But challenges are everywhere. Unpredictable cash flows. Overstretched teams. Lack of confidence in data. Manual processes. And an urgent need for agility and resiliency now.

## The power of concurrent planning increases the velocity of decision-making and supply chain transformation

Infor Planning One makes it quick, easy, and affordable for companies of all sizes to get started with their digital supply chain transformation and enable concurrent planning across end-to-end supply chain planning processes. Concurrent planning provides real-time, end-to-end supply chain rapid response and flexibility by enabling simultaneous planning across multiple functions that accelerates decision-making and improves overall resilience.

## Scenario modeling helps to build resilient, agile supply chains

The speed afforded by concurrent planning means planners can create new scenarios in seconds, model 'what-if' scenarios such as new orders, supply chain disruptions, or different sourcing options, and compare the results against cost, time, and customer service impacts.

## The fastest end-to-end in-production go-live on the market

Companies can go live with Infor Planning One in as little as 12-16 weeks, accelerating time to value. No pilots. No proof of concepts. Just a full in-production implementation using industry best practices, you get increased visibility, transparency, and accelerated decision-making, right out of the gate.

### 01

#### Quickly go from Excel to advanced planning

Get immediate relief from your biggest pain points by switching from Excel to advanced planning in as few as 12-16 weeks with the fastest in-production go-live on the market.

### 02

#### Effortlessly build enterprise-wide trust

Break down silos, create a shared, single source of truth, and align your organization around critical business objectives to cultivate trust across the entire organization.

### 03

#### Seamlessly expand your digital transformation

Easily extendable with no investment loss by adding on a wide range of additional planning functionality. The out-of-the-box integration to Infor CloudSuites accelerates delivery and provides comprehensive supply chain capabilities.

## An all-in-one advanced planning solution

Planning One delivers instant and continuous synchronization of concurrent planning across demand, supply, inventory, Sales and operations planning (S&OP), and operational planning.

### Infor Planning One

#### Operational planning

- Annual plan management
- Target setting
- Role-based dashboards
- Executive review/approval

#### Demand planning

- Consensus demand planning
- Forecast accuracy and forecast value-add (FVA) analysis
- Assumption management

#### Supply planning

- Excess and gating materials
- Constraint load management
- Supply and demand balancing

#### Inventory management

- Inventory analysis/policies
- Excess and obsolete analysis
- Inventory transfers

#### S&OP

- Scale and align processes
- Combine rolling forecasts
- Set financial targets and variability
- Drive sustainable cost reduction

**Go from Excel to in-production (not a trial, proof of concept or pilot) advanced planning in 16 weeks with Infor Planning One**

## The Power of Infor and Kinaxis

Planning One is a comprehensive advanced planning package that is fully integrated with Infor CloudSuite Industrial Enterprise, Cloudsuite Automotive, and Cloudsuite Aerospace & Defense, quickly bringing the most advanced artificial intelligence (AI)-infused supply chain optimization capabilities to drive better outcomes for our customers.

The solution provides complete transparency and agility across the entire supply chain—from multi-year strategic planning with scenario modeling to last-mile delivery. The preconfigured and out-of-the-box integration improves implementation time, customer time-to-value, and visibility across the supply chain. It delivers instant and continuous synchronization of concurrent planning across demand, supply, inventory, and operational planning.

## About Infor

Infor is a global leader in business cloud software products for companies in industry-specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
