

Transforming healthcare interoperability with Infor's Cloverleaf FHIR solutions

Unlock the potential of data to revolutionize patient care and operational insights through Infor's advanced FHIR integration tools.

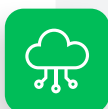

The data integration revolution in healthcare

Seamless data unity:

Integrate clinical and external data, including Social Determinants of Health and claims data, for comprehensive patient insights.

AI and ML empowerment:

Leverage cutting-edge analytics for personalized patient treatment plans, community health risk identification, and optimized electronic clinical quality measures (eCQMs).

The Infor advantage: Achieve unparalleled interoperability with Infor's cloud-based platform

- **Infor Cloverleaf[®] Integration Suite & Infor FHIR On-Ramp (IFOR):** Bridge diverse clinical data systems and transform legacy formats into FHIR R4, ensuring interoperability and data readiness for advanced healthcare applications.
- **AWS HealthLake:** Experience the zenith of data storage, transformation, and analysis, facilitated by a HIPAA-eligible environment that fosters innovation in healthcare services and population health management

Overcoming integration challenges

Comprehensive visibility:

Gain unparalleled insights into patient care disparities through aggregated data analysis, paving the way for accessible and targeted healthcare solutions.

Strategic partnerships for innovation:

In collaboration with AWS, Infor delivers end-to-end data integration, modernization solutions, and built-in AI and ML tools to advance precision care and population health outcomes.

Achieving interoperability and enhancing patient experience

Integrated healthcare ecosystems:

Ensure smooth integration with external applications for improved patient services, from transportation arrangements via ride-share apps to electronic paperwork processing.

Data-driven healthcare outcomes:

Utilize AWS and Infor's robust data capabilities to advance interoperability, enhance patient care, and meet emerging healthcare standards and mandates without sacrificing precious resources.

Empowering population health management

Insightful data analytics:

Identify and address gaps in healthcare delivery, streamline eCQM reporting, and embrace value-based care with real-time data integration and analysis.

A foundation for AI/ML innovations:

Create a unified data repository for predictive analytics and AI-driven health strategies, enhancing patient care and operational efficiency.

About Infor and AWS

Discover how Infor's partnership with AWS is creating new possibilities in healthcare data integration and interoperability, driving innovation, and improving population health outcomes.

About Infor

Infor is a global leader in business cloud software products for companies in industry specific markets. Infor builds complete industry suites in the cloud and efficiently deploys technology that puts the user experience first, leverages data science, and integrates easily into existing systems. Over 67,000 organizations worldwide rely on Infor to help overcome market disruptions and achieve business-wide digital transformation.
