Leverage AI and ML for smart decision-making and data-centric processes

Infor® provides strategic solutions to help organizations adopt advanced analytics driven by artificial Intelligence (AI) and machine learning (ML). Leveraging pre-built templates help organizations rapidly set up use-cases, quickly reap data insights, and achieve a measurable return on investment (ROI). The solutions fully integrate with our CloudSuites, giving business users throughout the organization the ability to benefit from data-centric decision-making. Infor can provide full support in managing these solutions to allow organizations to focus on successful business outcomes without the large upfront investment typically required for a new analytics initiative.

Whether you have existing algorithms or are just getting started, we can help you reach your goals. Together, we'll refine the vision and execution—always focused on a pragmatic return-on-investment and time-to-value. Our pre-built models and templates help you get your projects off the ground quickly. You'll see improvements to process flow and decision-making that will make your organization more agile and resilient to constant change.

AI/ML capabilities are the foundation for an end-to-end approach

Industry-focused, last-mile functionality is built into our solutions to help you implement quickly, accelerating business transformation. With one solution and fully integrated features, you'll get streamlined processes and full visibility across your teams, business units, and locations.

Benefits include:

- Insights that drive collaboration and measurable improvements to business performance
- The ability to measure the cost-effectiveness of new projects, products, and services
- Working with a single vendor and a single solution
- Greater ability to create business benefits and improve efficiencies by leveraging your data
- Self-service reporting that allows more people throughout the organization to leverage data-driven insights
- Full support of evolving the science as your business strategies change

Infor AI/ML models support your digitalization priorities

Improve operational efficiency

Operational intelligence

- Generate automated process triggers based on specific events or conditions
- » Results in improved process efficiency and fewer manual processes

Reduce costs

Asset intelligence

- Maximize the life of assets by utilizing predictive analytics on asset health, maintenance, and parts needs
- » Results in improved asset health, labor productivity, and inventory efficiency

Anticipate future needs

Forecast intelligence

- Predict future demand based on history and market conditions
- » Results in improved forecast accuracy, leading to inventory cost reduction and revenue growth

Focus on your customers

Customer sales intelligence

- Generate customer insights on what to sell and how to keep your customers happy
- » Results in more efficient customer interactions, greater customer retention, and revenue growth

Set ideal pricing for the market

Pricing decision intelligence

- Support profitability modeling using market drivers and price history
- » Results in improved pricing analysis to better inform market-centric pricing

Invest in your employees

Human capital intelligence

- Manage your most valuable resource: your people
- » Results in improved labor efficiency, reduced costs, increased employee satisfaction, and greater employee retention

Infor at your service:

- Tap into the expertise of our team of professionals, who are highly experienced in realizing value from ML solutions and can fill key roles such as data scientist, data engineer, solution manager, and project architect.
- Count on end-to-end support for the full ML cycle, from design to integration, model change, model deployment, and post-“go-live” support.
- Transform single departments or your entire operation. Our experienced subject matter experts can help you define and develop priorities.
- Count on us for the long-term, as we offer continuous model updates when additional AI/ML models are released.
- Rest assured that we manage and track for business value, with the focus on outcomes, not technology for the sake of technology.
- Save time and money by turning to a team of experienced professionals to build and maintain analytics for you.

We provide accessible and cost-effective tools for augmented intelligence, helping you succeed through data-driven decision-making.

Next steps

Infor AI and ML applications are part of a holistic end-to-end approach to business modernization. The advanced AI- and ML-powered applications seamlessly integrate with our Infor CloudSuite™ industry solutions to provide results-driven improvements to your manufacturing systems and processes.

Let Infor be your partner on your complete digital strategy, including helping you choose the right AI- and ML-powered enterprise resource planning (ERP) solution for your business. To learn more about Infor solutions for your enterprise, [visit our website](#).

Infor Data Science Managed Services packages help tailor AI/ML implementations to your specific needs and desired outcomes.
